0:0:0.0 --> 0:0:0.180
Basem Suleiman
Yeah.
0:0:1.280 --> 0:0:3.260
Basem Suleiman
Uh record.
0:0:5.40 --> 0:0:6.130
Basem Suleiman
Yeah, I don't.
0:0:6.220 --> 0:0:7.660
Basem Suleiman
I don't have bright too as well.
0:0:8.460 --> 0:0:9.250
Jordan Terzian
OK.
0:0:9.920 --> 0:0:10.80
Basem Suleiman
Maybe.
0:0:10.160 --> 0:0:12.320
Jordan Terzian
OK, that's all well.
0:0:12.920 --> 0:0:18.210
Basem Suleiman
I usually the one who organized the meeting, the organizer and the Co organizers, they can't record.
0:0:18.220 --> 0:0:21.810
Basem Suleiman
I don't know something is this by this?
0:0:19.610 --> 0:0:22.690
Jordan Terzian
Yeah, OK. Alright.
0:0:22.700 --> 0:0:25.280
Jordan Terzian
Well, we'll just move on to other questions then.
0:0:25.630 --> 0:0:30.400
Jordan Terzian
The next question is what important pages are required on the dashboard for tutors?
0:0:38.0 --> 0:0:38.200
Jordan Terzian
Yeah.
0:0:34.320 --> 0:0:40.570
Basem Suleiman
Important pages for the dash or for the dashboard are think OK, say for cheaters.
0:0:40.920 --> 0:0:46.370
Basem Suleiman
I think one thing we need to see is the request to book an appointment.

0:0:47.260 --> 0:0:47.690
Jordan Terzian
Mm-hmm.
0:0:51.320 --> 0:0:51.530
Jordan Terzian
Mm-hmm.
0:0:54.560 --> 0:0:54.830
Jordan Terzian
Yep.
0:0:48.340 --> 0:0:55.280
Basem Suleiman
This kind of request for booking uh, upcoming appointments or tutorial.
0:0:59.200 --> 0:1:3.690
Basem Suleiman
I think we might have some placeholders we might need to add things later on.
0:1:3.700 --> 0:1:6.590
Basem Suleiman
I think we'll figure out some more things, mostly.
0:1:10.190 --> 0:1:10.490
Jordan Terzian
OK.
0:1:6.700 --> 0:1:12.260
Basem Suleiman
Usually dashboard shows most important things that can take you from memory to their somewhere.
0:1:12.910 --> 0:1:13.410
Jordan Terzian
Yeah.
0:1:13.470 --> 0:1:21.0
Jordan Terzian
The only thing is because so the spec outlines are current pending requested appointments and then upcoming appointments.
0:1:21.50 --> 0:1:22.540
Jordan Terzian
And then it says import and pages.
0:1:22.550 --> 0:1:25.900
Jordan Terzian
My interpretation of that was like a working with children's check.
0:1:25.910 --> 0:1:27.870
Jordan Terzian
Maybe a link to the terms of service type thing?
0:1:29.770 --> 0:1:31.930
Basem Suleiman
Right, yeah.
0:1:30.940 --> 0:1:35.220
Jordan Terzian
Yeah, would that, would that be at the top of important pages that it might be referencing?

0:1:34.980 --> 0:1:35.250
Basem Suleiman
I want.
0:1:37.440 --> 0:1:40.590
Basem Suleiman
We, we might, I think here we might need to decide later on.
0:1:40.600 --> 0:1:40.970
Basem Suleiman
I just.
0:1:43.680 --> 0:1:43.950
Jordan Terzian
Yep.
0:1:40.980 --> 0:1:45.340
Basem Suleiman
I think once we go through more details and we might come back to this question again.
0:1:46.80 --> 0:1:46.590
Jordan Terzian
No worries.
0:1:46.600 --> 0:1:46.890
Jordan Terzian
OK.
0:1:46.900 --> 0:1:47.460
Jordan Terzian
Thank you.
0:1:48.90 --> 0:1:53.70
Jordan Terzian
In terms of system admins, what kind of what would they be able to see in the dashboard?
0:1:53.80 --> 0:1:56.890
Jordan Terzian
And according to the spec, they get to manage the users and the overall site.
0:1:57.430 --> 0:1:57.640
Basem Suleiman
Yeah.
0:1:57.320 --> 0:1:57.900
Jordan Terzian
What?
0:1:57.950 --> 0:2:0.470
Jordan Terzian
What do you envision for those people with that role?
0:2:1.210 --> 0:2:4.460
Basem Suleiman
Well, I think we can look at the according to the best practices.
0:2:4.470 --> 0:2:4.960
Basem Suleiman
What is?
0:2:4.970 --> 0:2:22.740
Basem Suleiman

What roles should be granted for the system admin to usually to control the system and if something they need to interfere with like uh and look and account or uh, they have the superpower rights to do things that can help or to control the system.
0:2:22.750 --> 0:2:28.380
Basem Suleiman
Otherwise we will stuck if someone stuck, they cannot change but their password for example, or they cannot move.
0:2:28.430 --> 0:2:30.950
Basem Suleiman
You need someone who has the power to do that.
0:2:32.790 --> 0:2:33.80
Jordan Terzian
OK.
0:2:32.190 --> 0:2:37.100
Basem Suleiman
So what I suggest is to look at the standard bearer missions.
0:2:41.160 --> 0:2:41.400
Jordan Terzian
Umm.
0:2:37.200 --> 0:2:44.360
Basem Suleiman
Uh for the system admin role in uh web apps, and we'll try to follow the standard, right?
0:2:44.370 --> 0:2:49.490
Basem Suleiman
So this is actually what we should do for this for this feature.
0:2:50.430 --> 0:2:51.0
Jordan Terzian
OK.
0:2:51.50 --> 0:2:51.490
Jordan Terzian
Thank you.
0:2:52.240 --> 0:3:3.290
Jordan Terzian
Uh, the last question from this group was, should we make a payment portal or is messaging messaging supposed to simulate payment via PayPal or other forms of digital transactions?
0:3:3.940 --> 0:3:5.890
Basem Suleiman
We can mock it up for now.
0:3:9.690 --> 0:3:9.890
Jordan Terzian
Yeah.
0:3:21.460 --> 0:3:21.600
Jordan Terzian
Yeah.
0:3:6.200 --> 0:3:21.610
Basem Suleiman
We don't need to make any real payment or, but I think if we can look up if there is an option

to, you know, mock it up through an API or like something that act as a payment system and written for you a confirmation or something like that, that's fine.
0:3:23.800 --> 0:3:24.590
Jordan Terzian
You wanna get you guys?
0:3:24.600 --> 0:3:25.30
Jordan Terzian
Yeah.
0:3:25.200 --> 0:3:44.120
Jordan Terzian
My questions were more related to the look and the feel of the sites we're building it for you and we wanted to get an understanding of do you want it to be more UNSW focused UNSW branding in the side to or do you want us to create our own color palette to other said and branding guidelines you want to follow?
0:3:45.380 --> 0:3:46.390
Basem Suleiman
Thank you for the question.
0:3:46.400 --> 0:3:47.590
Basem Suleiman
This is a good question.
0:3:47.960 --> 0:3:49.290
Basem Suleiman
This, we're gonna keep it.
0:3:51.380 --> 0:3:53.850
Basem Suleiman
Are not tightly coupled with any branding.
0:3:54.660 --> 0:3:54.850
Jordan Terzian
Mm-hmm.
0:3:54.770 --> 0:3:56.760
Basem Suleiman
Say it's not specific to you.
0:3:56.770 --> 0:4:1.600
Basem Suleiman
This W sorry, you can think of anyone can come in and say I can tutor and someone can.
0:4:1.610 --> 0:4:3.440
Basem Suleiman
They can book an appointment with them.
0:4:4.190 --> 0:4:4.600
Jordan Terzian
Awesome.
0:4:4.650 --> 0:4:6.760
Basem Suleiman
Yes, it's quite open for everyone.
0:4:4.610 --> 0:4:7.620
Jordan Terzian
OK, so free, right, Wilson.

0:4:7.630 --> 0:4:8.10
Jordan Terzian
OK.
0:4:8.50 --> 0:4:10.640
Jordan Terzian
But is there any brand you see synergy with the?
0:4:10.650 --> 0:4:13.560
Jordan Terzian
Do you want there to be easy crossover with UNSW?
0:4:13.570 --> 0:4:15.650
Jordan Terzian
Perhaps and similar branding language.
0:4:17.0 --> 0:4:17.190
Basem Suleiman
No.
0:4:19.440 --> 0:4:22.170
Basem Suleiman
I want maybe we can look at this later on.
0:4:22.220 --> 0:4:30.830
Basem Suleiman
I think more looking into, I mean I think it can be easily done if we do other things first, right?
0:4:31.840 --> 0:4:32.140
Jordan Terzian
Umm.
0:4:30.840 --> 0:4:34.280
Basem Suleiman
So I would say elicit priority at the moment.
0:4:35.330 --> 0:4:35.930
Jordan Terzian
OK.
0:4:36.170 --> 0:4:36.930
Jordan Terzian
OK, no worries.
0:4:37.910 --> 0:4:41.840
Jordan Terzian
Alright, well this is a another group they've asked.
0:4:44.320 --> 0:4:47.290
Jordan Terzian
Clarify what it means to manage user accounts on the platform.
0:4:47.300 --> 0:4:51.950
Jordan Terzian
I think you just said that in case someone gets locked out of their account, changes password et cetera.
0:4:52.20 --> 0:4:53.220
Jordan Terzian
So you've answered that already.

0:4:53.820 --> 0:4:54.50
Basem Suleiman
Yep.
0:4:54.30 --> 0:5:6.170
Jordan Terzian
Uh, once that and just look at it makes any two chooses from over tree that had to see if I have the client with the subject display would be a list.
0:5:6.280 --> 0:5:7.230
Jordan Terzian
Of those, skip that one.
0:5:8.410 --> 0:5:10.920
Jordan Terzian
Uh, OK.
0:5:10.970 --> 0:5:15.790
Jordan Terzian
Should admins determine whether or not support documents are considered valid?
0:5:15.840 --> 0:5:22.750
Jordan Terzian
Moreover, she tutors only be considered to be able to teach this subject to give these documents a manually validated by an admin.
0:5:24.80 --> 0:5:27.510
Basem Suleiman
So it will be manually validated by an admin.
0:5:27.520 --> 0:5:38.220
Basem Suleiman
I think I need to differentiate here between so we've got system admin user they have like high uh powerful control over the system.
0:5:38.900 --> 0:5:39.240
Jordan Terzian
Umm.
0:5:39.130 --> 0:5:45.380
Basem Suleiman
The other kind of admin, they are more into helping both sides.
0:5:47.640 --> 0:5:49.190
Jordan Terzian
Sure does. OK.
0:5:45.390 --> 0:5:50.880
Basem Suleiman
The let's say students and tutors right in in both cases.
0:5:51.300 --> 0:6:1.840
Basem Suleiman
So they someone tried to mediate or facilitate any issues, one of them, one of the things that we will do is to actually approve someone documents and check it.
0:6:2.230 --> 0:6:5.230
Basem Suleiman
So they should be manual checked and sure that everything is fine.

0:6:6.90 --> 0:6:17.0
Basem Suleiman
They might be able to things we we might also need to consider of going like to do an interview and doing a kind of maybe part of the interview or in a separate session at training.
0:6:17.10 --> 0:6:21.360
Basem Suleiman
So what they will do, they will say, OK, uh documents checked.
0:6:21.950 --> 0:6:35.880
Basem Suleiman
Uh, they also take another thing like interview made and then also the training session completed, so they have some things or some stuff they check from the tutor site before they get them on board.
0:6:37.930 --> 0:6:39.30
Jordan Terzian
Cool. OK.
0:6:40.730 --> 0:6:42.610
Jordan Terzian
Alright, next one was.
0:6:47.770 --> 0:6:55.510
Jordan Terzian
Should also reach out to OK this one in my opinion can be a little bit open ended, but it makes sense.
0:6:56.40 --> 0:7:0.710
Jordan Terzian
Students are the spec says students can select courses they would like to get help with.
0:7:0.880 --> 0:7:5.470
Jordan Terzian
Is this related to searching for tutors based on filters or a profile setting?
0:7:5.740 --> 0:7:12.110
Jordan Terzian
If the latter, should this imply that tutors should also reach out to students via messaging or anything else?
0:7:12.180 --> 0:7:19.710
Jordan Terzian
Otherwise, there's ends up being sort of a meaningless feature as student search for what they want anyway, OK.
0:7:21.680 --> 0:7:25.470
Basem Suleiman
I mean, for the students, they should see a list of tutors and what they teach.
0:7:25.480 --> 0:7:25.870
Basem Suleiman
Right.
0:7:26.300 --> 0:7:26.500
Jordan Terzian
Yeah.

0:7:26.100 --> 0:7:28.210
Basem Suleiman
And they should look at their ratings.
0:7:28.220 --> 0:7:31.190
Basem Suleiman
Or maybe their bio and other information.
0:7:32.110 --> 0:7:34.820
Basem Suleiman
And from there they can choose to book an appointment with them.
0:7:35.560 --> 0:7:35.740
Jordan Terzian
Yeah.
0:7:35.620 --> 0:7:37.900
Basem Suleiman
This one one feature that that makes sense, right?
0:7:38.480 --> 0:7:39.170
Jordan Terzian
Yes, exactly.
0:7:39.310 --> 0:7:39.450
Basem Suleiman
Yeah.
0:7:39.680 --> 0:7:42.720
Basem Suleiman
Now they are the one I think you mentioned is where.
0:7:45.0 --> 0:7:46.550
Basem Suleiman
How how did the other one works?
0:7:48.760 --> 0:7:49.850
Jordan Terzian
Umm, the.
0:7:49.900 --> 0:8:0.950
Jordan Terzian
So we've actually done it this way in our one is when you're on sign up, when a student signs up to the site, they can put these subjects they want help with in like A tag section which will show up like that as well.
0:8:0.960 --> 0:8:3.310
Jordan Terzian
So it's a little bit more information for the tutor side I would say.
0:8:3.420 --> 0:8:6.170
Basem Suleiman
It is some something additional.
0:8:12.650 --> 0:8:12.980
Jordan Terzian
Yep.
0:8:6.420 --> 0:8:13.50
Basem Suleiman

It's something like we can definitely let the main thing is the students find that tutors they want right now.
0:8:13.60 --> 0:8:20.170
Basem Suleiman
I think things they might this tags might help later on to cluster or group students say these students want to look at science.
0:8:20.180 --> 0:8:23.710
Basem Suleiman
These students want to look at programming and and and so on.
0:8:23.720 --> 0:8:25.630
Basem Suleiman
So tags will help.
0:8:30.130 --> 0:8:30.350
Jordan Terzian
Yeah.
0:8:25.640 --> 0:8:33.340
Basem Suleiman
I think we might not consider letting the tutors contact the students because they will be overwhelmed and the serious might not like it.
0:8:33.350 --> 0:8:35.460
Basem Suleiman
They leave the serious choose they researchers.
0:8:35.310 --> 0:8:36.600
Jordan Terzian
Yeah. Yeah.
0:8:36.660 --> 0:8:44.430
Jordan Terzian
That so yeah, we considered it from that end as well, given that the working with children's check, which I don't think the students should be the ones reaching out to the adults.
0:8:44.440 --> 0:8:45.460
Jordan Terzian
That should be the other way.
0:8:45.470 --> 0:8:48.610
Jordan Terzian
Initiates the conversation first, which makes sense as well.
0:8:47.360 --> 0:8:49.360
Basem Suleiman
Exactly. Cool.
0:8:49.190 --> 0:8:49.780
Jordan Terzian
Umm.
0:8:49.840 --> 0:8:50.420
Jordan Terzian
OK.
0:8:50.510 --> 0:8:58.530
Jordan Terzian

The next question was are the subjects that can be taught decided by the system admins or the tutors can make up subjects they want to teach?
0:9:0.180 --> 0:9:3.560
Basem Suleiman
Uh, that's very good question. Uh.
0:9:13.320 --> 0:9:13.540
Jordan Terzian
Mm-hmm.
0:9:27.520 --> 0:9:27.750
Jordan Terzian
Yeah.
0:9:5.630 --> 0:9:29.50
Basem Suleiman
OK, so the problem with letting the tutors to add they might be duplicate and the non standard terminology uh, I'm initially I did think about we have a list of uh courses of topics that the cheaters can choose from and this may follow kind of standard maybe uh let's say standard uh topics basic.
0:9:29.870 --> 0:9:37.780
Jordan Terzian
You know, could you implement almost like a like a search drop down that they can search for courses and add it to their like what they can teach that way.
0:9:37.790 --> 0:9:41.700
Jordan Terzian
So it's standardized, so it's like in a standard search box almost and they can pick from that.
0:9:42.230 --> 0:9:43.540
Basem Suleiman
I think that would be nice.
0:9:44.70 --> 0:9:51.720
Basem Suleiman
When you specially have large number of courses or topics, umm the what I was thinking for.
0:9:57.430 --> 0:9:57.630
Jordan Terzian
Yeah.
0:9:51.730 --> 0:10:1.370
Basem Suleiman
If they want to list something that does not exist, it might need to go to the admin to approve it, because you wanna have you wanna make sure that it remains consistent.
0:10:1.380 --> 0:10:4.70
Basem Suleiman
You don't have duplicates and confusing terms.
0:10:3.970 --> 0:10:4.260
Jordan Terzian
Yeah.
0:10:5.450 --> 0:10:14.640
Basem Suleiman
I would say the standard way of selecting from a Bree existing or created lists and then we can we may add.

0:10:14.650 --> 0:10:17.620
Basem Suleiman
Our system admin might add some more new ones.
0:10:18.990 --> 0:10:20.30
Jordan Terzian
OK. Awesome.
0:10:20.40 --> 0:10:21.560
Jordan Terzian
That makes that makes sense.
0:10:22.30 --> 0:10:22.840
Jordan Terzian
OK.
0:10:22.900 --> 0:10:34.900
Jordan Terzian
The next one is students can write the Tudor if they complete at least a one point with them, but this could be an easily abusable system depending on how an employment is marked done or not.
0:10:34.950 --> 0:10:44.560
Jordan Terzian
Unless it's some auto magical process, it should either be manually marked by the tutor as completed, or maybe as an optional setting the auto completed once the appointments finish time is over.
0:10:47.460 --> 0:10:48.560
Basem Suleiman
This is tricky 1.
0:10:54.890 --> 0:10:55.150
Jordan Terzian
Yep.
0:11:3.840 --> 0:11:4.20
Jordan Terzian
Yeah.
0:10:51.500 --> 0:11:6.870
Basem Suleiman
Say how we market section is completed, so we might think both sides into agreement agree that they completed decision and the other side say are completed decision umm and give feedback on that.
0:11:7.820 --> 0:11:13.290
Basem Suleiman
Uh, that way we have an agreement and we say it's completed, but if we have a disagreement, we need to.
0:11:13.300 --> 0:11:16.710
Basem Suleiman
I think I have a mechanism to deal with that because it's hard to say.
0:11:23.420 --> 0:11:23.680
Jordan Terzian
OK.

0:11:17.980 --> 0:11:23.830
Basem Suleiman
Maybe it's a magical way to say it's completed at both sides without their input.
0:11:24.400 --> 0:11:28.150
Basem Suleiman
I mean, what one thing we can do is to look at it differently.
0:11:43.310 --> 0:11:43.630
Jordan Terzian
Umm.
0:11:28.520 --> 0:11:44.400
Basem Suleiman
We just say, you know, if the student attended and the student and tutor attended the session and that that's considered to be completed, but after that they can raise a concern of giving feedback if something happens.
0:11:44.510 --> 0:11:47.370
Basem Suleiman
Uh, so the default is like if you attended decision.
0:11:48.170 --> 0:11:50.300
Basem Suleiman
Umm that means.
0:11:50.990 --> 0:11:57.100
Basem Suleiman
And again, I don't know if we will count for the time we just say we attended for the whole all duration.
0:11:57.880 --> 0:11:58.110
Jordan Terzian
Mm-hmm.
0:11:57.880 --> 0:12:7.670
Basem Suleiman
Uh, that would be considered as completed, but if if you need to raise the student needs to raise the concern or the tutor, they might just need to write.
0:12:17.600 --> 0:12:18.180
Jordan Terzian
OK.
0:12:7.900 --> 0:12:18.440
Basem Suleiman
They have an option to write back and say I have something to open about this case or this session, and then we might change the status after we figure out you know how to address that.
0:12:18.220 --> 0:12:22.770
Jordan Terzian
So I guess what you're talking about here is a standardized form of reporting then as well.
0:12:22.780 --> 0:12:26.50
Jordan Terzian
If an issue word or arise, so keep it simple unless there's a report function.

0:12:26.60 --> 0:12:26.480
Jordan Terzian
Almost.
0:12:26.840 --> 0:12:27.300
Jordan Terzian
Yeah.
0:12:27.80 --> 0:12:27.820
Basem Suleiman
Yeah, yeah.
0:12:27.400 --> 0:12:29.680
Jordan Terzian
OK, awesome.
0:12:30.330 --> 0:12:32.240
Jordan Terzian
Uh, OK.
0:12:32.450 --> 0:12:37.860
Jordan Terzian
The tutors dashboard includes request to approve and important pages other than messages requests.
0:12:38.290 --> 0:12:40.480
Jordan Terzian
What other requests should this pertain to?
0:12:40.490 --> 0:12:44.930
Jordan Terzian
Moreover, what are these important we already talked about this, so that's fine. Umm.
0:12:48.400 --> 0:12:58.570
Jordan Terzian
OK, should message requests work as something akin to meters messenger platform, where a user can provide some context to continued messages later via an initial message.
0:12:58.580 --> 0:13:5.320
Jordan Terzian
So almost like a approved message decline if for contact type thing or is it up to us to choose how to implement that?
0:13:6.400 --> 0:13:10.820
Basem Suleiman
I think we research what's the best way, I think. Umm.
0:13:13.230 --> 0:13:34.890
Basem Suleiman
I think they consideration of the, I mean we we keep options for for both parties like the case we had before this one basically we if we we have an option for them if they wouldn't need to let's say they contact each other or discuss anything after that it it might it might need to be facilitated.
0:13:34.900 --> 0:13:35.490
Basem Suleiman
I don't know.

0:13:40.700 --> 0:13:40.930
Jordan Terzian
Yeah.
0:13:35.980 --> 0:13:45.940
Basem Suleiman
It's not a direct message I think, or someone can directly contact the other one, I believe because if you think about it, it might become overwhelming for jitter when they have many students.
0:13:48.580 --> 0:13:48.850
Jordan Terzian
You know?
0:13:45.950 --> 0:13:49.500
Basem Suleiman
Do you always receive messages and then they start to say we need to deal with this separately?
0:13:50.380 --> 0:13:50.930
Jordan Terzian
Yeah.
0:13:51.130 --> 0:13:53.80
Basem Suleiman
Uh. Yep.
0:13:51.20 --> 0:14:1.10
Jordan Terzian
And in my brain in in my mind, I would say that the best way to handle it is these Tudor cannot be messaged by a student until they approve the request for an appointment.
0:14:2.590 --> 0:14:2.900
Jordan Terzian
Before.
0:14:2.320 --> 0:14:4.430
Basem Suleiman
The ones they have one appointment with them.
0:14:4.800 --> 0:14:5.20
Jordan Terzian
Yeah.
0:14:4.820 --> 0:14:5.270
Basem Suleiman
Uh.
0:14:5.280 --> 0:14:7.160
Basem Suleiman
They might ask about that, that appointment.
0:14:7.170 --> 0:14:7.790
Basem Suleiman
That's good.
0:14:16.390 --> 0:14:17.670
Jordan Terzian
Yep, yeah.

0:14:7.860 --> 0:14:19.880
Basem Suleiman
After they complete decision with them also are they you think that we should also keep them in touch to message that might be possible I think yeah.
0:14:19.990 --> 0:14:26.280
Basem Suleiman
So you're having an appointment, you know, that might help to actually discuss if we want to change the time or what?
0:14:26.300 --> 0:14:26.500
Jordan Terzian
Yeah.
0:14:34.90 --> 0:14:34.290
Jordan Terzian
Mm-hmm.
0:14:26.290 --> 0:14:36.320
Basem Suleiman
I thought in Italy if they wanna change the time the students go independently, change the time, that tutor will be notified straight away, alright, and then the tutor.
0:14:36.330 --> 0:14:42.470
Basem Suleiman
It's up to the tutor to decide, but I think there's a case where they might need to say OK, I need to change the time.
0:14:42.480 --> 0:14:43.720
Basem Suleiman
I need to know what time is suitable.
0:14:43.730 --> 0:14:45.320
Basem Suleiman
They should see it from the calendar.
0:14:46.280 --> 0:14:47.160
Jordan Terzian
Yeah, yeah.
0:14:45.330 --> 0:14:50.330
Basem Suleiman
Then what I want to say keep it like, uh, not very much dependent.
0:14:50.340 --> 0:15:1.700
Basem Suleiman
You have to ask and then say let's change it and all of that because you at the same time you might expect things happening like at the students spoke a time that you say you are great to do, but then it's spoked.
0:15:3.320 --> 0:15:3.840
Jordan Terzian
OK.
0:15:3.900 --> 0:15:5.150
Jordan Terzian
Yeah, that make that makes sense.

0:15:4.250 --> 0:15:5.500
Basem Suleiman
The yeah.
0:15:5.560 --> 0:15:6.980
Basem Suleiman
Yeah, thinking of concurrency.
0:15:6.990 --> 0:15:10.30
Basem Suleiman
This will be an A matter when we do blocking or appointment.
0:15:10.930 --> 0:15:15.200
Basem Suleiman
I would say they should go and change things directly in the calendar.
0:15:16.160 --> 0:15:17.230
Jordan Terzian
Alright, cool.
0:15:17.820 --> 0:15:22.550
Jordan Terzian
We're on to the next group now, so this first one, what do you mean by filter?
0:15:24.150 --> 0:15:24.440
Basem Suleiman
Number.
0:15:22.560 --> 0:15:29.670
Jordan Terzian
By experience, number of you do you mean number of years taught courses, schools they've taught at what kind of are you?
0:15:29.710 --> 0:15:30.520
Jordan Terzian
Are you looking for there?
0:15:30.900 --> 0:15:32.390
Basem Suleiman
It's going to be both.
0:15:32.740 --> 0:15:43.880
Basem Suleiman
So basically the use of experience they have provided and the other one is we look at the how many sessions they had, right.
0:15:49.410 --> 0:15:49.630
Jordan Terzian
Umm.
0:15:43.890 --> 0:15:52.850
Basem Suleiman
I think if we look at it as a metric number of positions they had on the platform here, I think they can have their own bus experience as well.
0:15:55.390 --> 0:15:56.970
Jordan Terzian
OK, cool.

0:15:58.460 --> 0:16:1.800
Jordan Terzian
Is the product for university students or general tuition.

0:16:9.810 --> 0:16:11.220
Jordan Terzian
Yeah, I was at the same time.

0:16:3.590 --> 0:16:11.420
Basem Suleiman
Ohm, if we we can make it generic so that it accepts any doesn't matter what. Yeah.

0:16:11.350 --> 0:16:11.590
Jordan Terzian
Yeah.

0:16:13.120 --> 0:16:13.340
Jordan Terzian
Cool.

0:16:13.930 --> 0:16:19.100
Jordan Terzian
Umm is there a need for multiple units or organizations to use the platform?

0:16:19.210 --> 0:16:26.550
Jordan Terzian
For example, students can say they're enrolled at UNSW, then they can only access UNSW tutors and select UNSW course codes.

0:16:30.750 --> 0:16:30.940
Jordan Terzian
OK.

0:16:27.370 --> 0:16:31.540
Basem Suleiman
But I think it's always keeping it all and we're not link it to university.

0:16:32.960 --> 0:16:33.550
Jordan Terzian
Yep.

0:16:33.910 --> 0:16:35.930
Jordan Terzian
Uh, we I think we're really is.

0:16:37.910 --> 0:16:41.660
Jordan Terzian
Is there a need for tutors messaging tutors slash students messaging students?

0:16:41.670 --> 0:16:43.560
Jordan Terzian
I think we already talked about that already.

0:16:43.570 --> 0:16:44.310
Jordan Terzian
There's no real need.

0:16:44.810 --> 0:16:44.950
Basem Suleiman
Yes.

0:16:45.150 --> 0:16:46.660
Jordan Terzian
Uh, yeah.
0:16:46.710 --> 0:16:49.580
Jordan Terzian
Does the product need to support group messaging?
0:16:49.690 --> 0:16:50.690
Jordan Terzian
OK, that's an interesting one.
0:16:51.340 --> 0:16:52.460
Basem Suleiman
Good messaging.
0:16:53.10 --> 0:16:57.730
Jordan Terzian
That, for example, if a Tudor has two people at the same time for an appointment, I know that's a common convention.
0:16:58.670 --> 0:17:0.590
Basem Suleiman
Well, that actually brings the point.
0:17:1.150 --> 0:17:4.780
Basem Suleiman
We didn't mention that two people can book.
0:17:6.240 --> 0:17:6.480
Jordan Terzian
Yep.
0:17:4.790 --> 0:17:20.60
Basem Suleiman
It's one on one now that opened up for another thing is like uh, I think one on one is is better because that's where people need to get customized or tailored session rather than a group.
0:17:20.510 --> 0:17:23.560
Basem Suleiman
If it's a group based, maybe that's an option, we can make it.
0:17:29.710 --> 0:17:29.930
Jordan Terzian
Yeah.
0:17:23.570 --> 0:17:36.90
Basem Suleiman
Just say you can book multiple people can bookmark, think it might be difficult to manage because you dealing with two different people and you need to have time for both and how you're gonna accumulate what that I think let's give it one on one.
0:17:36.730 --> 0:17:37.10
Jordan Terzian
Yeah.
0:17:37.20 --> 0:17:37.200
Jordan Terzian
OK.

0:17:37.210 --> 0:17:39.90
Jordan Terzian
101 easy real quick.
0:17:39.130 --> 0:17:41.700
Jordan Terzian
I had a question more on the technical side of things.
0:17:41.710 --> 0:17:46.60
Jordan Terzian
Do you have a preference on cloud provider and technology is used?
0:17:47.290 --> 0:17:49.300
Basem Suleiman
Uh, I will not restrict that.
0:17:49.530 --> 0:17:50.420
Basem Suleiman
I will.
0:17:50.490 --> 0:17:53.40
Basem Suleiman
I will keep the technology stack open.
0:17:53.820 --> 0:17:54.150
Jordan Terzian
Umm.
0:18:6.610 --> 0:18:6.810
Jordan Terzian
Yeah.
0:17:54.90 --> 0:18:7.760
Basem Suleiman
My approach is looking at the end outcome trying to build whether you're using any technology stack, using a building, reliable, scalable system, secure course.
0:18:13.990 --> 0:18:14.290
Jordan Terzian
Umm.
0:18:8.170 --> 0:18:21.10
Basem Suleiman
Now the reason that I don't wanna choose the big something specific because if you are experienced with something or some team members are experienced with the technology stack, you can easily, you know, start working with that.
0:18:21.420 --> 0:18:21.660
Jordan Terzian
Yeah.
0:18:21.20 --> 0:18:25.990
Basem Suleiman
You don't need to build your experience around the new one, umm, otherwise you.
0:18:25.160 --> 0:18:26.50
Jordan Terzian
The terms of.

0:18:27.70 --> 0:18:27.360
Jordan Terzian
Yeah.
0:18:27.370 --> 0:18:32.900
Jordan Terzian
And in terms of scalability, what kind of, you know, end scalable goal?
0:18:32.910 --> 0:18:33.380
Jordan Terzian
Do you see?
0:18:33.490 --> 0:18:39.720
Jordan Terzian
Do you see it being interregional or do you see it being just a here in the Pacific region?
0:18:39.890 --> 0:18:43.630
Jordan Terzian
And do you see a sorry go for it?
0:18:44.70 --> 0:18:44.800
Basem Suleiman
No, that's OK.
0:18:44.810 --> 0:18:45.940
Basem Suleiman
That's a good question.
0:18:50.380 --> 0:18:50.580
Jordan Terzian
Umm.
0:18:55.200 --> 0:18:55.380
Jordan Terzian
Yeah.
0:18:46.290 --> 0:18:55.800
Basem Suleiman
Let's say like interregional one uh, but initially, definitely we'll focus on like something within Australia, right.
0:18:55.810 --> 0:18:58.580
Basem Suleiman
There will not like jump into the the bigger picture.
0:18:59.440 --> 0:19:0.220
Basem Suleiman
Uh yeah.
0:18:59.540 --> 0:19:2.90
Jordan Terzian
Yeah, OK.
0:19:3.50 --> 0:19:4.610
Jordan Terzian
This is another one.
0:19:4.620 --> 0:19:6.400
Jordan Terzian
Can a user have multiple roles?

0:19:6.410 --> 0:19:10.50
Jordan Terzian
For example, can I tutor be a student or can a student or tutor be an admin?
0:19:13.280 --> 0:19:14.360
Basem Suleiman
I think no.
0:19:15.270 --> 0:19:15.490
Jordan Terzian
Yep.
0:19:16.100 --> 0:19:16.450
Basem Suleiman
Yeah.
0:19:16.750 --> 0:19:16.970
Jordan Terzian
Yeah.
0:19:22.380 --> 0:19:22.580
Jordan Terzian
Yeah.
0:19:16.460 --> 0:19:25.380
Basem Suleiman
And I think if you want to be student and dura, I think you should sign up with two different accounts because your email will be used for signing up and it has to be unique.
0:19:26.400 --> 0:19:26.790
Jordan Terzian
OK.
0:19:26.840 --> 0:19:28.320
Jordan Terzian
Yep, sounds good.
0:19:28.940 --> 0:19:32.520
Jordan Terzian
Uh, I think we're we already talked about that next one.
0:19:33.230 --> 0:19:40.670
Jordan Terzian
OK, our ratings only number based DG One to five or can students also have optional written reviews as well?
0:19:45.140 --> 0:19:45.360
Jordan Terzian
OK.
0:19:41.520 --> 0:19:48.810
Basem Suleiman
I think we should have overall and written one and what I thought we can also have a breakdown.
0:19:49.160 --> 0:19:58.790
Basem Suleiman
Definitely we have like a five star rating, but we could break it down into a few things, something about maybe a timing, something about content.

0:20:3.100 --> 0:20:3.420
Jordan Terzian
Cool.
0:20:3.820 --> 0:20:4.530
Jordan Terzian
That sounds good.
0:19:58.800 --> 0:20:5.30
Basem Suleiman
So we can create maybe a metric for for measuring different things with the start right here.
0:20:6.850 --> 0:20:7.320
Jordan Terzian
OK.
0:20:7.400 --> 0:20:9.180
Jordan Terzian
Uh, this is actually like this question.
0:20:9.510 --> 0:20:13.560
Jordan Terzian
What happens if we want to do something that isn't specified in the requirements?
0:20:13.570 --> 0:20:17.630
Jordan Terzian
For example, let's say we make it that every user needs a strong password.
0:20:17.640 --> 0:20:22.300
Jordan Terzian
This isn't specified in the spec, nor is it a novel requirement, as websites already do this.
0:20:22.430 --> 0:20:29.710
Jordan Terzian
Do we need a note down somewhere in the proposal if we implement this in our project or are we not meant to implement this at all since it isn't in the requirements?
0:20:30.140 --> 0:20:39.670
Basem Suleiman
No, I think the I things I would say, best practices and things that we often when we say we don't talk about it because it's now standard.
0:20:39.680 --> 0:20:46.420
Basem Suleiman
Like when you creating password like we should expect the user to create like a a good password.
0:20:46.910 --> 0:20:51.60
Basem Suleiman
If we keep it very simple that the user input 1 character, this is not really good.
0:20:51.720 --> 0:20:51.940
Jordan Terzian
Yeah.
0:20:51.310 --> 0:20:53.420
Basem Suleiman
If we relax it, we don't do anything about it.

0:20:53.510 --> 0:20:57.260
Basem Suleiman
But what I would say we will not go into the streams.
0:20:57.270 --> 0:21:4.880
Basem Suleiman
You can go up to high level in the security with too many complicated things that influence users experience, right?
0:21:5.150 --> 0:21:15.110
Basem Suleiman
So we find the middleware that we say OK, we do a bit of mechanisms to ensure that the password is strong or good enough, but we don't wanna make it too extreme.
0:21:15.120 --> 0:21:16.380
Basem Suleiman
Asking too much for the user.
0:21:17.70 --> 0:21:18.100
Jordan Terzian
Yeah, I understood.
0:21:18.350 --> 0:21:23.460
Jordan Terzian
OK, umm is everything set once we submit our proposal?
0:21:23.470 --> 0:21:26.500
Jordan Terzian
Or are we still allowed to change our project as we grow through it?
0:21:26.590 --> 0:21:28.800
Jordan Terzian
That is different from what we suggested in their proposal.
0:21:28.810 --> 0:21:30.450
Jordan Terzian
So I guess storyboards as an example.
0:21:30.470 --> 0:21:32.240
Basem Suleiman
Ohh, I think so.
0:21:42.200 --> 0:21:42.340
Jordan Terzian
Yeah.
0:21:32.320 --> 0:21:48.180
Basem Suleiman
Will be the changes will not be fundamental, but I think thinking of Adam and Scrum, I would say you would expect it to change things because that's a, you know, the spirit of scrum, but you won't have like significant changes happening.
0:21:50.190 --> 0:21:50.370
Jordan Terzian
Yeah.
0:21:53.480 --> 0:21:53.890
Jordan Terzian
OK.

0:21:53.900 --> 0:22:2.550
Jordan Terzian
Well, there's a question here that I think is uh, it says for appointment, should we use built-in message systems in this website or could we use an external platform like teams or zoom?

0:22:2.560 --> 0:22:3.990
Jordan Terzian
I think we have to use a built-in one.

0:22:4.230 --> 0:22:4.380
Basem Suleiman
But.

0:22:4.0 --> 0:22:4.970
Jordan Terzian
That's one of the requirement.

0:22:6.630 --> 0:22:10.880
Basem Suleiman
The built Lim I think the built in one is needs management.

0:22:11.490 --> 0:22:12.710
Basem Suleiman
I think it wasn't listed.

0:22:14.540 --> 0:22:15.870
Basem Suleiman
A built-in appointment?

0:22:15.880 --> 0:22:17.800
Basem Suleiman
That to do the meeting right or the.

0:22:18.900 --> 0:22:19.190
Jordan Terzian
Umm.

0:22:20.590 --> 0:22:20.890
Basem Suleiman
Uh.

0:22:21.210 --> 0:22:22.680
Jordan Terzian
Would just be messaging in general.

0:22:22.690 --> 0:22:24.770
Jordan Terzian
I'd imagine that they'd use external platforms.

0:22:24.110 --> 0:22:28.290
Basem Suleiman
We had been messaging, but I think doing that something like a video conferencing.

0:22:28.810 --> 0:22:29.90
Basem Suleiman
Yeah.

0:22:28.500 --> 0:22:29.500
Jordan Terzian
Yeah, that'd be separate.

0:22:29.370 --> 0:22:31.0
Basem Suleiman
Also, there's a different thing.
0:22:31.580 --> 0:22:32.860
Jordan Terzian
Yeah, cool.
0:22:31.490 --> 0:22:35.10
Basem Suleiman
Yeah, they will be on the side at different system.
0:22:35.660 --> 0:22:43.30
Jordan Terzian
Yep, there for those that didn't hear that messaging built-in, but meeting and video calls on an external platform that's specified by the tutor.
0:22:43.650 --> 0:22:43.870
Basem Suleiman
Yep.
0:22:43.750 --> 0:22:45.200
Jordan Terzian
Uh, we already?
0:22:45.330 --> 0:22:47.300
Jordan Terzian
We already asked that was already asked.
0:22:48.130 --> 0:22:48.640
Jordan Terzian
OK.
0:22:48.690 --> 0:22:51.550
Jordan Terzian
Should we only allow admin to allocate shooters?
0:22:51.560 --> 0:22:56.150
Jordan Terzian
Shooters could just accept or join a courses group by some verification code, so again.
0:23:5.750 --> 0:23:5.970
Jordan Terzian
Umm.
0:22:57.540 --> 0:23:6.250
Basem Suleiman
I think the admin will add the tutors after they complete all the affairs the complete their profile, provide documents, they go to the next steps.
0:23:6.320 --> 0:23:7.150
Basem Suleiman
It's a process.
0:23:7.820 --> 0:23:9.370
Basem Suleiman
They do an interview.
0:23:9.380 --> 0:23:12.40
Basem Suleiman
They do training if needed.

0:23:12.100 --> 0:23:12.260
Jordan Terzian
Yeah.
0:23:12.940 --> 0:23:16.290
Basem Suleiman
Uh, say, and after completing that they appear in the system.
0:23:17.770 --> 0:23:19.110
Jordan Terzian
Yeah. OK.
0:23:21.720 --> 0:23:30.450
Jordan Terzian
Should the appointment modify between shooter and student in real time if they would like to modify the appointment or just something like a message, I'll actually add to that one.
0:23:31.890 --> 0:23:32.80
Basem Suleiman
Yeah.
0:23:30.900 --> 0:23:33.210
Jordan Terzian
They should be notified by a notification first.
0:23:33.220 --> 0:23:34.750
Jordan Terzian
I think judge by the spec.
0:23:36.150 --> 0:23:41.430
Basem Suleiman
Umm, when you say real time doesn't mean you started decision and you wanna change.
0:23:42.240 --> 0:23:42.400
Jordan Terzian
Yes.
0:23:43.880 --> 0:23:47.250
Basem Suleiman
I think it's a tricky 1 because if you start it, that means you.
0:23:47.340 --> 0:23:52.330
Basem Suleiman
If you need to change, change should have been before the session and we might set a time for that.
0:23:52.340 --> 0:23:55.500
Basem Suleiman
Like uh, maybe 15 minutes.
0:23:56.650 --> 0:24:4.750
Basem Suleiman
I think it's fair for the tutor as well because if they are booked and someone else will need to book them, they lose this opportunity, right?
0:24:4.670 --> 0:24:4.870
Jordan Terzian
Yeah.

0:24:5.510 --> 0:24:9.720
Basem Suleiman
So we see the time, say 15 minutes you need and we, but it's part of the rules.
0:24:9.730 --> 0:24:11.950
Basem Suleiman
Maybe we have a kind of rules for both.
0:24:12.810 --> 0:24:13.100
Jordan Terzian
Umm.
0:24:12.630 --> 0:24:13.300
Basem Suleiman
What is?
0:24:14.90 --> 0:24:14.540
Basem Suleiman
You know?
0:24:14.550 --> 0:24:16.40
Basem Suleiman
Possible what is not possible?
0:24:16.410 --> 0:24:18.800
Basem Suleiman
And then I think they adhere to that.
0:24:21.390 --> 0:24:22.140
Jordan Terzian
Yep.
0:24:23.150 --> 0:24:26.400
Jordan Terzian
OK, we already had this question.
0:24:27.10 --> 0:24:33.650
Jordan Terzian
OK, when filtering by location, to what extent do we need to filter them and then they put postcode questionmark?
0:24:37.140 --> 0:24:38.600
Basem Suleiman
Both code is 1 I think.
0:24:39.750 --> 0:24:41.890
Basem Suleiman
Yeah, we we can include the.
0:24:43.680 --> 0:24:50.570
Basem Suleiman
Umm, as I'm assuming some scenes like might be sitting somewhere like in other countries.
0:24:50.630 --> 0:24:54.810
Basem Suleiman
They say they are in vacation but they wanna do this tutorial or working studying online.
0:24:55.720 --> 0:25:0.150
Basem Suleiman
So I would say the country will be listed because that will help with the.

0:25:1.110 --> 0:25:4.780
Basem Suleiman
Umm, with the time zone looking at the time zone as well.
0:25:5.520 --> 0:25:5.730
Jordan Terzian
Umm.
0:25:5.250 --> 0:25:17.610
Basem Suleiman
And when you want to find a time that you show, for example, for the tutor time that suits their time zone, if they set, I'm happy available in nine to five or nine to six in Australia, that will be according to time zone here.
0:25:18.940 --> 0:25:19.340
Jordan Terzian
OK.
0:25:19.350 --> 0:25:19.950
Jordan Terzian
Yeah.
0:25:20.10 --> 0:25:24.820
Jordan Terzian
Could we also, you know, ask them to enable sharing location to get an estimate of how far they are away.
0:25:24.830 --> 0:25:25.490
Jordan Terzian
They are from each other.
0:25:26.540 --> 0:25:28.550
Basem Suleiman
And enable.
0:25:29.480 --> 0:25:30.60
Basem Suleiman
I don't know.
0:25:29.340 --> 0:25:30.330
Jordan Terzian
At the users discretion.
0:25:31.80 --> 0:25:34.770
Basem Suleiman
I think I think they should know way where you like.
0:25:34.780 --> 0:25:36.280
Basem Suleiman
Where is the student located?
0:25:37.110 --> 0:25:37.330
Jordan Terzian
Yeah.
0:25:36.500 --> 0:25:38.870
Basem Suleiman
Says like the country and they give you an idea.

0:25:43.760 --> 0:25:43.960
Jordan Terzian
Cool.
0:25:40.90 --> 0:25:45.570
Basem Suleiman
About where the calling from or where they, you know, yeah.
0:25:46.600 --> 0:25:50.630
Jordan Terzian
OK, how many users do you expect to use this platform?
0:25:50.640 --> 0:25:52.520
Jordan Terzian
How many students and how many teach tutors?
0:25:53.650 --> 0:25:55.570
Basem Suleiman
Well, that's a difficult question.
0:25:55.750 --> 0:25:56.660
Basem Suleiman
I can't tell.
0:25:56.910 --> 0:25:57.740
Basem Suleiman
I can't tell.
0:25:57.910 --> 0:26:6.680
Basem Suleiman
I don't know, but I think we just say one thing we plan for is try to design and implement with the scaling in mind, right?
0:26:6.530 --> 0:26:6.710
Jordan Terzian
Yeah.
0:26:18.850 --> 0:26:19.0
Jordan Terzian
And.
0:26:6.690 --> 0:26:20.530
Basem Suleiman
So basically, whether it's coming to your consideration in the code or in the system architecture that it can scale with good performance, I wanna mention something in 3 minutes.
0:26:20.540 --> 0:26:25.90
Basem Suleiman
I have a an urgent school meeting that I have to join for 15 minutes.
0:26:25.540 --> 0:26:32.10
Basem Suleiman
I'll hopefully they stick to 15 minutes and I got this around after I emailed you guys so I got that.
0:26:31.840 --> 0:26:34.180
Jordan Terzian
Umm, yeah, yeah.

0:26:32.190 --> 0:26:34.550
Basem Suleiman
It's a deal with the go say.
0:26:34.390 --> 0:26:36.780
Jordan Terzian
We actually only have like four more questions.
0:26:37.620 --> 0:26:41.210
Basem Suleiman
Yeah, but I also have other things I want to share with you, at least.
0:26:42.870 --> 0:26:43.130
Jordan Terzian
Yep.
0:26:41.220 --> 0:26:46.160
Basem Suleiman
If the team leads can join again after I finish the other meeting.
0:26:46.950 --> 0:26:47.260
Jordan Terzian
Yeah.
0:26:47.270 --> 0:26:48.20
Jordan Terzian
What time will that be?
0:26:52.530 --> 0:26:52.710
Jordan Terzian
Yeah.
0:26:49.340 --> 0:26:54.960
Basem Suleiman
Again, the meeting is 15 minutes 3:15 to 3:30, so hopefully they finish on time.
0:26:55.910 --> 0:26:56.760
Jordan Terzian
OK, cool.
0:26:56.770 --> 0:27:2.620
Jordan Terzian
So we can just wait in here maybe and we'll wait for you to join back whenever you're ready.
Yeah.
0:27:3.170 --> 0:27:4.160
Basem Suleiman
Yeah, that would be great.
0:27:5.190 --> 0:27:5.620
Jordan Terzian
Cool.
0:27:5.690 --> 0:27:5.930
Jordan Terzian
OK.
0:27:6.390 --> 0:27:10.210
Jordan Terzian
Umm, alright, we'll just ask a few more questions you guys are.

0:27:7.760 --> 0:27:12.30
Basem Suleiman
Of I think 2 minutes I will mention I will mention a few things.
0:27:12.480 --> 0:27:12.740
Jordan Terzian
Yep.
0:27:12.40 --> 0:27:16.400
Basem Suleiman
Actually we can think or discuss together during this time basically.
0:27:18.610 --> 0:27:28.520
Basem Suleiman
There's a possibility to consider that we have many teams to consider the options for working as bigger teams or we split member.
0:27:28.530 --> 0:27:29.860
Basem Suleiman
How many teams we have here?
0:27:30.230 --> 0:27:43.100
Basem Suleiman
Maybe 8 or or 10, but I think we might think of splitting into say if if somebody is is willing to work as a big team and they work on a whole system together as a front end and back end.
0:27:43.270 --> 0:27:57.370
Basem Suleiman
So they might have two or two teams for front end, two teams for back end, or one team for front end, one team for back end and they build 1 system and we have an option for the requirements you see there is quite generic.
0:27:57.380 --> 0:27:57.930
Basem Suleiman
You might.
0:27:57.940 --> 0:28:10.50
Basem Suleiman
We might ohh consider customizing these by something something say I will implement the core features but I will make a tailored in a in a certain way right?
0:28:10.60 --> 0:28:14.410
Basem Suleiman
So we might just make add something that makes it different than the normal tutoring things.
0:28:14.880 --> 0:28:18.490
Basem Suleiman
So there there is this possibility given that we have large number of teams.
0:28:23.750 --> 0:28:23.950
Jordan Terzian
Yeah.
0:28:18.860 --> 0:28:24.890
Basem Suleiman
So you may discuss that during the 15 minutes until I get back, you don't need to give me an answer.

0:28:24.900 --> 0:28:30.720
Basem Suleiman
Even when I come back, you might need more time to discuss that, but at least you can use the time, yeah.
0:28:28.10 --> 0:28:40.480
Jordan Terzian
We, but would we not in terms of how we'd be marked for that, are we gonna be marked like because we already formed groups of five and we are working on that as a team?
0:28:40.570 --> 0:28:41.560
Jordan Terzian
Is that gonna be allowed?
0:28:41.570 --> 0:28:46.650
Jordan Terzian
Cause doesn't give other teams on other projects an unfair advantage of two teams are working on one project together.
0:28:45.450 --> 0:28:53.790
Basem Suleiman
Things are going I I will discuss the uh, actually something we need to also discuss with the tutors mentors.
0:28:53.650 --> 0:28:53.850
Jordan Terzian
Yeah.
0:28:53.800 --> 0:28:59.340
Basem Suleiman
Let them know about that arrangement and making sure that you cover or you do enough work for each team.
0:29:1.860 --> 0:29:2.80
Jordan Terzian
Umm.
0:28:59.350 --> 0:29:3.140
Basem Suleiman
Whether you do it front end or back end or you do different things as a big team.
0:29:3.950 --> 0:29:4.850
Basem Suleiman
Yeah, I will.
0:29:4.860 --> 0:29:5.650
Basem Suleiman
I'll discuss that.
0:29:5.660 --> 0:29:6.600
Basem Suleiman
Uh, we're not come back.
0:29:7.340 --> 0:29:8.330
Jordan Terzian
Alright, no worries.
0:29:8.670 --> 0:29:9.40
Basem Suleiman
Great.

0:29:9.50 --> 0:29:9.610
Basem Suleiman
Thank you guys.
0:29:8.720 --> 0:29:10.310
Jordan Terzian
Well, we'll see you when you come back then.
0:29:10.780 --> 0:29:11.120
Basem Suleiman
Sure.
0:29:11.130 --> 0:29:12.150
Basem Suleiman
Hopefully in 15 minutes.
0:29:12.160 --> 0:29:12.480
Basem Suleiman
Thank you.
0:29:12.880 --> 0:29:13.160
Jordan Terzian
OK.
0:29:13.170 --> 0:29:13.850
Jordan Terzian
Thank you.
0:29:15.510 --> 0:29:16.470
Jordan Terzian
When you do 4:30.
0:29:17.70 --> 0:29:22.460
Jordan Terzian
So umm for those that join midway for there was a lot of question about the important pages.
0:29:22.530 --> 0:29:25.380
Jordan Terzian
He essentially said it's left up to you, but he might scrap it.
0:29:25.390 --> 0:29:28.880
Jordan Terzian
I mentioned like a working with children's check and in terms of service.
0:29:29.460 --> 0:29:34.970
Jordan Terzian
So if you wanna put links to those type of pages, I think that would be fine, but he will be back I assume.
0:29:37.110 --> 0:29:37.810
Michael Mortlock-Chapman
5 for them.
0:29:37.350 --> 0:29:44.450
Vinh Pham
In terms of working with like other teams, how's it gonna work if you're, for example, in a different tooth? Yeah.

0:29:43.250 --> 0:29:44.460
Jordan Terzian
Exactly what I was saying.
0:29:44.470 --> 0:29:45.770
Jordan Terzian
Question I'd like to find out.
0:29:45.780 --> 0:29:49.140
Jordan Terzian
That's what I don't understand, and I think it's kind of unfair for other teams.
0:29:49.150 --> 0:29:56.440
Jordan Terzian
Anyway, I think having five people in a back end and five people in a back end, that's literally you can literally make a full software.
0:29:57.980 --> 0:29:58.840
Vinh Pham
Yeah, for sure.
0:29:56.620 --> 0:29:58.900
Jordan Terzian
Yeah, two teams, four teams.
0:29:59.590 --> 0:30:1.620
Jordan Terzian
Full scale app with 100.
0:30:0.750 --> 0:30:7.120
Vinh Pham
He even suggested 2 on the back and two in the front, which probably we can probably make something pretty hefty with.
0:30:9.920 --> 0:30:10.200
Vinh Pham
Yeah.
0:30:6.830 --> 0:30:14.530
Jordan Terzian
That mean you could do it in a week if you had that many people, but at the end of the day he is coming from like the perspective of he has a product he needs built.
0:30:14.540 --> 0:30:18.250
Jordan Terzian
So for him it makes sense, like if I've got 10 people I wanna ten groups.
0:30:18.260 --> 0:30:19.730
Jordan Terzian
I wanna do my project 1.
0:30:19.740 --> 0:30:21.830
Jordan Terzian
They're all working together to build something really great then.
0:30:22.740 --> 0:30:23.800
Vinh Pham
And be interesting.

0:30:24.910 --> 0:30:26.440
Jordan Terzian
I don't think they're gonna allow that.
0:30:26.450 --> 0:30:27.720
Jordan Terzian
Yeah, yeah.
0:30:27.730 --> 0:30:30.780
Jordan Terzian
I don't think the classroom only allows five people.
0:30:30.790 --> 0:30:31.440
Jordan Terzian
Exactly.
0:30:31.450 --> 0:30:32.460
Jordan Terzian
Exactly it wouldn't work.
0:30:35.260 --> 0:30:36.960
Michael Mortlock-Chapman
Alright, with the important pages.
0:30:36.220 --> 0:30:39.590
Jordan Terzian
I think his idea is more like a sorry.
0:30:39.640 --> 0:30:40.110
Jordan Terzian
I'll. I'll.
0:30:40.120 --> 0:30:41.490
Jordan Terzian
I'll leave it open.
0:30:41.500 --> 0:30:42.890
Jordan Terzian
I just was looking if we could download it.
0:30:42.960 --> 0:30:43.460
Jordan Terzian
OK.
0:30:43.470 --> 0:30:44.840
Jordan Terzian
I'm just gonna move to the chat for now.
0:30:44.880 --> 0:30:46.850
Jordan Terzian
Yeah, I'm.
0:30:45.560 --> 0:30:47.250
Michael Mortlock-Chapman
With the important pages, it's this.
0:30:46.860 --> 0:30:49.410
Jordan Terzian
I'm gonna hope he just misspoke in regards to that.

0:30:53.160 --> 0:30:54.710
Jordan Terzian
I don't, I don't think so.

0:30:54.760 --> 0:30:56.410
Jordan Terzian
Where will I be able to find the recording?

0:30:56.420 --> 0:30:57.610
Jordan Terzian
I can't stay pass through 30.

0:30:57.620 --> 0:31:0.730
Jordan Terzian
There's a transcript that we were just looking at as well.

0:31:0.740 --> 0:31:3.810
Jordan Terzian
It's a pretty accurate to we can't record for some reason.

0:31:3.820 --> 0:31:5.230
Jordan Terzian
I actually think it's the.

0:31:5.680 --> 0:31:6.330
Jordan Terzian
What is it?

0:31:6.400 --> 0:31:9.70
Jordan Terzian
UNSW doesn't allow you to record Microsoft Teams.

0:31:9.80 --> 0:31:11.860
Jordan Terzian
Yeah, there's a organization setting. Yeah.

0:31:11.900 --> 0:31:16.890
Jordan Terzian
So I'll drop the transcript and the teams and in the Google and the discord as well.

0:31:16.900 --> 0:31:18.260
Jordan Terzian
So if you wanna see it later.

0:31:20.830 --> 0:31:21.410
Jordan Terzian
Thanks.

0:31:21.950 --> 0:31:23.860
Jordan Terzian
Umm, yeah, alright, cool.

0:31:25.460 --> 0:31:30.450
Jordan Terzian
And also in terms of like branding and stuff, you gotta need, you could put one team on branding.

0:31:30.580 --> 0:31:37.420
Jordan Terzian
So if he wants to split up and even because you can't have two teams with two different ideas working on the same thing, like it's just the you have crossover, it's not gonna work.

0:31:45.630 --> 0:31:47.440
Jordan Terzian
Try my best, but I've definitely messed up.
0:31:47.450 --> 0:31:51.490
Jordan Terzian
Yeah, I think everyone would have messed up, but the transcript, like I said, is really good.
0:31:51.530 --> 0:31:52.980
Jordan Terzian
I was just looking at it as well.
0:31:52.990 --> 0:32:0.270
Jordan Terzian
While I left, it's got everything a few like minor grammatical errors, but you'll be able to get everything out of that.
0:32:0.280 --> 0:32:1.810
Jordan Terzian
You'll get across what he was saying.
0:32:3.220 --> 0:32:4.310
Jordan Terzian
We're here to 4:30.
0:32:4.370 --> 0:32:4.880
Jordan Terzian
Yeah. Yes.
0:32:4.890 --> 0:32:6.730
Jordan Terzian
So I don't want to stay here.
0:32:7.620 --> 0:32:12.360
Jordan Terzian
Does anyone have any questions of other than the people that we were up to?
0:32:12.900 --> 0:32:16.90
Jordan Terzian
Also, if there are any duplicate questions, can people edit them out please?
0:32:16.200 --> 0:32:18.290
Jordan Terzian
I'm trying my best to not ask him the same question twice.
0:32:25.570 --> 0:32:36.720
Daniel Wang
So my understanding of messaging is like as like a student searches for Tudor and then like they they're like try to book a time slot and the tutor would like agree to it to like a request, right?
0:32:37.170 --> 0:32:37.310
Jordan Terzian
Yes.
0:32:37.30 --> 0:32:38.500
Daniel Wang
And then they would be able to message.

0:32:39.200 --> 0:32:41.130
Jordan Terzian
Yes, that's exactly how I've done it as well.
0:32:47.560 --> 0:32:48.100
Daniel Wang
Right.
0:32:41.140 --> 0:32:48.830
Jordan Terzian
And it makes sense because I don't think the you should be able to contact child until you have an actual appointment confirmed, or at least discussing, right?
0:32:48.950 --> 0:32:49.340
Daniel Wang
OK.
0:32:49.390 --> 0:32:49.610
Daniel Wang
Yeah.
0:32:49.620 --> 0:32:49.960
Daniel Wang
Yeah.
0:32:50.780 --> 0:32:52.100
Jordan Terzian
Yes. Yeah.
0:32:50.10 --> 0:32:59.230
Daniel Wang
I just wanted to make sure because I wasn't cause like this is like like students can add courses they do but then like, what's the point of that if like 2 days contact them anyway and yeah.
0:33:0.240 --> 0:33:1.200
Jordan Terzian
You can always edit.
0:33:1.210 --> 0:33:4.30
Jordan Terzian
Well, that's what the edit profile is for UK.
0:33:4.40 --> 0:33:4.480
Jordan Terzian
You should be.
0:33:4.490 --> 0:33:7.820
Jordan Terzian
You should be able to add courses that you need help with at a later date as well.
0:33:7.660 --> 0:33:23.210
Daniel Wang
Right, like cause how I'm thinking about it is like the students like well courses they want and then like the the tutors who aren't like umm that don't do those courses would just be filtered out like in when they just search already when they before they even started searching.
0:33:23.790 --> 0:33:28.520
Jordan Terzian

I wouldn't even limit it though, because they might want to just look and they can add it to themselves later.
0:33:28.830 --> 0:33:29.370
Daniel Wang
Right.
0:33:28.530 --> 0:33:31.340
Jordan Terzian
Like you get, you can still filter like horse in the search function.
0:33:33.50 --> 0:33:33.270
Daniel Wang
Umm.
0:33:31.350 --> 0:33:35.790
Jordan Terzian
It says it in the requirements, so just I don't think you have to go into that level of detail to be honest with you.
0:33:36.80 --> 0:33:36.660
Daniel Wang
Right. OK.
0:33:36.190 --> 0:33:38.560
Vinh Pham
It might be a like a recommendation thing.
0:33:39.220 --> 0:33:39.460
Jordan Terzian
Yeah.
0:33:38.570 --> 0:33:45.320
Vinh Pham
So if a student has courses that they need help with, these platform itself recommends tutors straight to the student.
0:33:45.930 --> 0:33:46.290
Daniel Wang
Umm.
0:33:46.510 --> 0:33:46.710
Jordan Terzian
Yeah.
0:33:46.950 --> 0:33:48.190
Vinh Pham
That could be a thing as well.
0:33:48.670 --> 0:33:49.20
Daniel Wang
Yeah.
0:33:49.30 --> 0:33:49.210
Daniel Wang
OK.
0:33:50.400 --> 0:33:54.160
Daniel Wang
And then like for approving like tutors and stuff.

0:33:54.170 --> 0:34:11.590
Daniel Wang
So I guess but don't know how like admin creation profile like works like I I assume you just they just exist on the platform once it's built, but like for tutors like if you like someone tries to create like a tutor profile I guess umm it it would be like a request to the admins once.
0:34:13.310 --> 0:34:13.850
Jordan Terzian
Pretty much.
0:34:11.600 --> 0:34:14.950
Daniel Wang
It's like completed like a form and then there will be allowed on the platform.
0:34:15.0 --> 0:34:15.590
Daniel Wang
Yeah. OK.
0:34:15.150 --> 0:34:15.650
Jordan Terzian
Yeah.
0:34:15.710 --> 0:34:23.210
Jordan Terzian
And then I guess the question that I was actually I've just thought of is do you admins register the platform or are we just pretending they pre exist on the platform?
0:34:27.30 --> 0:34:27.990
Jordan Terzian
I'll I'll add it in.
0:34:23.300 --> 0:34:36.950
Daniel Wang
Yeah, that's like I've got to add that as a question because it doesn't make sense to me like how like to create a admin profile like how there isn't like another level in the hierarchy to request.
0:34:36.250 --> 0:34:39.380
Jordan Terzian
Yeah, I'll make up the first question I asked when he comes back.
0:34:39.660 --> 0:34:40.10
Daniel Wang
Yeah.
0:34:40.20 --> 0:34:40.600
Daniel Wang
Thanks. Thanks.
0:34:46.670 --> 0:34:51.840
Jordan Terzian
Remember when this was supposed to be 5 people each talking to him, and now there's 40 people in here?
0:34:53.150 --> 0:34:54.560
Daniel Wang
Appreciate the reach out.

0:34:55.650 --> 0:34:56.410
Jordan Terzian
That's alright.
0:34:56.420 --> 0:34:57.570
Jordan Terzian
No one else is gonna do it.
0:34:57.580 --> 0:34:58.800
Jordan Terzian
I don't think so.
0:34:58.840 --> 0:35:0.650
Jordan Terzian
Like just everyone in the chat?
0:35:0.660 --> 0:35:0.960
Jordan Terzian
Who cares?
0:35:3.0 --> 0:35:3.390
Daniel Wang
It's a pretty.
0:35:3.240 --> 0:35:8.0
Jordan Terzian
We've also only got 11 groups in here, so where the other ten?
0:35:8.10 --> 0:35:10.430
Jordan Terzian
Who knows? Yeah.
0:35:9.540 --> 0:35:11.670
Daniel Wang
This is like pretty like organizes.
0:35:11.720 --> 0:35:12.910
Daniel Wang
This isn't like wild.
0:35:12.920 --> 0:35:15.70
Daniel Wang
This is pretty that's good.
0:35:16.100 --> 0:35:16.820
Jordan Terzian
Thank you, Jordan.
0:35:16.830 --> 0:35:17.360
Jordan Terzian
You're welcome.
0:35:17.520 --> 0:35:17.980
Jordan Terzian
Anytime.
0:35:27.90 --> 0:35:28.720
Jordan Terzian
I like how it was display.

0:35:28.830 --> 0:35:30.730
Jordan Terzian
Does that sound like a static one?
0:35:30.740 --> 0:35:32.190
Jordan Terzian
Enough. Yeah.
0:35:32.200 --> 0:35:33.640
Jordan Terzian
Yeah, cool fixes the burning.
0:35:33.710 --> 0:35:34.590
Jordan Terzian
Yeah, that's it.
0:35:40.360 --> 0:35:41.480
Jordan Terzian
If somehow.
0:35:42.30 --> 0:35:48.500
Jordan Terzian
And you know, like God, divine intervention that they end up doing like a major group for this project.
0:35:50.420 --> 0:35:51.280
Jordan Terzian
What do you want to do?
0:35:51.770 --> 0:35:54.160
Jordan Terzian
I think you I don't as long as you're marks unaffected.
0:35:54.170 --> 0:35:55.30
Jordan Terzian
I think it's fine.
0:35:55.150 --> 0:36:0.720
Jordan Terzian
I I wouldn't mind if we had just one massive front end team because it's a big scale project at the end of the day.
0:36:0.770 --> 0:36:5.720
Jordan Terzian
Like you can, you can make a really small version of this, or you can make a huge one like this.
0:36:5.730 --> 0:36:7.290
Jordan Terzian
There's the scale of this project.
0:36:7.300 --> 0:36:10.80
Jordan Terzian
Can span heaps, so I don't know.
0:36:10.90 --> 0:36:10.880
Jordan Terzian
Like I don't.
0:36:10.890 --> 0:36:16.470
Jordan Terzian

I have a vision there and not going to allow that to happen because you can't standardize the marks in comparison to the other.
0:36:16.630 --> 0:36:27.250
Jordan Terzian
You know, projects, if we have like literally like two groups of 50 people just, you know, three groups of whatever 30 doing 1 project together for one product.
0:36:27.260 --> 0:36:27.920
Jordan Terzian
It's a bit unfair.
0:36:32.670 --> 0:36:34.860
Jordan Terzian
If it's impossible to sorry, I just saw this all over.
0:36:34.870 --> 0:36:35.660
Jordan Terzian
My bad.
0:36:35.730 --> 0:36:40.440
Jordan Terzian
If it is impossible to form a big group, maybe we can ask if he can reduce some workload for each team.
0:36:40.450 --> 0:36:42.310
Jordan Terzian
I think I don't think he'll do that.
0:36:42.390 --> 0:36:45.760
Jordan Terzian
He's also not the team lead for the other projects that I think.
0:36:45.990 --> 0:36:48.200
Jordan Terzian
I think there's different clients for different.
0:36:48.810 --> 0:36:50.970
Jordan Terzian
No, but I think he's made for the project.
0:36:50.980 --> 0:36:53.180
Jordan Terzian
This project to graph right?
0:36:53.890 --> 0:36:55.960
Jordan Terzian
It's like, what do you still find this for this project?
0:36:56.650 --> 0:36:57.570
Jordan Terzian
No worries, Michael.
0:36:57.580 --> 0:36:59.120
Jordan Terzian
Thank you for the thank you.
0:36:59.130 --> 0:36:59.830
Jordan Terzian
I appreciate it.

0:36:59.840 --> 0:37:0.430
Jordan Terzian
That's right.
0:37:1.350 --> 0:37:1.790
Jordan Terzian
That's right.
0:37:0.950 --> 0:37:2.640
Daniel Wang
Oh yeah, and on the.
0:37:3.330 --> 0:37:15.450
Daniel Wang
Umm, like appointment completion thing like I I guess the consensus for like completion is both sides market but like what if like one size one side doesn't market like did he say anything about that?
0:37:15.540 --> 0:37:16.220
Daniel Wang
I think I missed it.
0:37:16.590 --> 0:37:17.160
Jordan Terzian
It didn't.
0:37:17.170 --> 0:37:25.370
Jordan Terzian
I, from what I've gathered from what he said so far, is he has a lot of no answers himself, and I think it's kind of up to us to come up with the best system for it.
0:37:25.670 --> 0:37:26.390
Daniel Wang
Right. OK.
0:37:26.0 --> 0:37:26.410
Jordan Terzian
Umm.
0:37:27.60 --> 0:37:29.590
Jordan Terzian
Like a lot of this like I that's what I've gotten.
0:37:29.600 --> 0:37:30.490
Jordan Terzian
Right, you've gotten that too.
0:37:30.500 --> 0:37:31.730
Jordan Terzian
Some things he just doesn't know.
0:37:31.740 --> 0:37:31.920
Jordan Terzian
Just.
0:37:31.930 --> 0:37:37.940
Jordan Terzian
Yeah, I I think he's got like a general idea and probably the business case for it, but specifics are still yet to be determined.

0:37:39.890 --> 0:37:40.670
Jordan Terzian
Yeah, like.
0:37:40.30 --> 0:37:43.300
Daniel Wang
Well, he's like heading like for other projects or something.
0:37:43.790 --> 0:37:44.10
Jordan Terzian
Easy.
0:37:43.510 --> 0:37:48.800
Daniel Wang
Last time I checked like like is the client for like 161718.
0:37:48.810 --> 0:37:50.730
Daniel Wang
At least I don't know.
0:37:50.740 --> 0:37:52.970
Daniel Wang
I think there's probably more than that, I think.
0:37:50.450 --> 0:37:57.540
Jordan Terzian
Well, that'd be funny if you booked another hour like at 3:30 with another one person.
0:37:57.620 --> 0:37:58.570
Daniel Wang
That is hilarious.
0:37:57.990 --> 0:38:4.800
Jordan Terzian
The thing The thing is right, it's like when I asked him why would tutors need to see other tutors?
0:38:4.810 --> 0:38:5.890
Jordan Terzian
And he's like, yeah, you're right.
0:38:5.900 --> 0:38:6.800
Jordan Terzian
We'll get rid of that.
0:38:6.930 --> 0:38:7.390
Jordan Terzian
I was like bro.
0:38:13.690 --> 0:38:15.990
Jordan Terzian
Anyway, we don't.
0:38:16.0 --> 0:38:16.280
Jordan Terzian
Yeah.
0:38:16.290 --> 0:38:20.780
Jordan Terzian
If anyone has any wants to add more questions to the document in the chat, feel free.

0:38:20.790 --> 0:38:24.760
Jordan Terzian
We only really have like 2-2 more groups by the looks of it.
0:38:25.760 --> 0:38:26.680
Jordan Terzian
Uh yeah.
0:38:33.810 --> 0:38:34.850
Jordan Terzian
Log in and operate.
0:38:39.290 --> 0:38:39.680
Jordan Terzian
Ah, yeah.
0:38:39.690 --> 0:38:40.960
Jordan Terzian
OK, that's where God's the admin question.
0:38:40.970 --> 0:38:41.640
Jordan Terzian
Question.
0:38:41.950 --> 0:38:45.180
Jordan Terzian
Is there a list that we really asked that we already asked this last one?
0:38:45.190 --> 0:38:46.720
Jordan Terzian
Can a user be multiple types?
0:38:46.730 --> 0:38:48.230
Jordan Terzian
No, we've we've already asked that.
0:38:48.310 --> 0:38:54.770
Jordan Terzian
OK, so these last two, we've already sorry, Wednesday, actually I'll keep your name in there, but we've asked those questions already.
0:38:57.630 --> 0:38:58.780
Jordan Terzian
Users with different.
0:38:58.830 --> 0:38:59.850
Jordan Terzian
I'm assuming that the admins.
0:38:59.860 --> 0:39:0.610
Jordan Terzian
Yeah, that's fine.
0:39:1.420 --> 0:39:2.730
Jordan Terzian
Uh, OK, yeah.
0:39:2.740 --> 0:39:5.500
Jordan Terzian
We only really have two questions left, so I guess we'll see what he says.

0:39:11.130 --> 0:39:12.230
Jordan Terzian
Yeah, yeah.
0:39:7.620 --> 0:39:14.100
Daniel Wang
The system admin things also like still pretty vague like standard web stop and then like approving tutors I guess.
0:39:16.590 --> 0:39:18.630
Jordan Terzian
I just don't know what part of the like.
0:39:20.840 --> 0:39:22.510
Jordan Terzian
I'm just trying to think in terms of UI.
0:39:22.520 --> 0:39:28.310
Jordan Terzian
How different this is gonna look because I don't see a need for them to find other tutors, right?
0:39:28.320 --> 0:39:29.50
Jordan Terzian
Like they can.
0:39:29.380 --> 0:39:30.10
Jordan Terzian
I don't know.
0:39:30.360 --> 0:39:30.890
Jordan Terzian
I have no idea.
0:39:44.460 --> 0:39:48.760
Jordan Terzian
The house everyone's day going that time of the day, yeah.
0:39:49.230 --> 0:39:50.200
Daniel Wang
It's still going out.
0:39:50.210 --> 0:39:51.560
Daniel Wang
I'm here in front of my computer.
0:39:53.240 --> 0:39:54.50
Jordan Terzian
Fair enough.
0:39:54.240 --> 0:39:55.750
Jordan Terzian
Where at work it.
0:39:56.380 --> 0:39:57.130
Daniel Wang
Ohh lovely.
0:40:12.440 --> 0:40:13.710
Jordan Terzian
Do whatever respond to me.

0:40:14.170 --> 0:40:20.940
Jordan Terzian
He's that he's probably on his way now because he graduation just finished and I don't think it don't expect to hear from for a while.
0:40:37.350 --> 0:40:37.720
Guodong Chen
Can you?
0:40:43.170 --> 0:40:43.870
Guodong Chen
Thank period.
0:40:49.350 --> 0:40:49.700
Guodong Chen
Thank you.
0:40:56.250 --> 0:40:56.380
Guodong Chen
Yeah.
0:40:58.100 --> 0:40:58.870
Daniel Wang
O yeah.
0:40:59.60 --> 0:41:3.630
Daniel Wang
Did you guys catch what he said about like appointment modification?
0:41:3.640 --> 0:41:4.820
Daniel Wang
I kind of didn't get most of that.
0:41:5.420 --> 0:41:12.240
Jordan Terzian
He he was saying that you can modify an appointment up to 15 minutes before your appointment, in which case you're not allowed to modify it after that fact.
0:41:12.840 --> 0:41:13.290
Daniel Wang
Right.
0:41:13.300 --> 0:41:13.630
Daniel Wang
OK.
0:41:13.640 --> 0:41:13.950
Daniel Wang
Thanks.
0:41:14.800 --> 0:41:15.0
Jordan Terzian
Yeah.
0:41:15.340 --> 0:41:18.780
Daniel Wang
I heard of 15 minute but I didn't really realize what it was.
0:41:19.940 --> 0:41:20.510
Jordan Terzian
Yeah.

0:41:20.560 --> 0:41:21.890
Jordan Terzian
And then he should say, he said.
0:41:24.100 --> 0:41:24.920
Guodong Chen
God made it good luck.
0:41:21.900 --> 0:41:30.390
Jordan Terzian
When you modify it, these student, the student should get a notification or you should get a message first like either I think.
0:41:30.400 --> 0:41:34.370
Jordan Terzian
Either way, you get a notification at the very least if the tutors are **** and doesn't message them.
0:41:34.920 --> 0:41:35.540
Daniel Wang
OK.
0:41:35.520 --> 0:41:36.840
Vinh Pham
Wait, so this?
0:41:36.240 --> 0:41:37.330
Daniel Wang
What would it be like?
0:41:37.660 --> 0:41:38.300
Daniel Wang
Ohh you go first.
0:41:38.620 --> 0:41:41.530
Vinh Pham
Unsw say like, is the modification of the appointment.
0:41:41.540 --> 0:41:46.240
Vinh Pham
Both sides, like there's Julia, can modify, and the two they can modify it or what are we gonna?
0:41:47.30 --> 0:41:57.500
Jordan Terzian
I he didn't really specify on that my my thing would be if the student wants to modify the appointment he has to message the tutor and ask to begin with and then the tutor can be the only one to modify it from the fly.
0:41:57.510 --> 0:41:58.950
Jordan Terzian
That makes the most in my opinion.
0:42:2.590 --> 0:42:2.910
Jordan Terzian
Correct.
0:41:58.810 --> 0:42:4.10
Vinh Pham
And then even then, the Tudor is limited to that 15 minute mark. OK.

0:42:5.40 --> 0:42:7.170
Guodong Chen
Uh-huh. OK.
0:42:11.90 --> 0:42:12.60
Guodong Chen
So that you.
0:42:22.420 --> 0:42:22.960
Guodong Chen
What holiday?
0:42:28.30 --> 0:42:28.900
Guodong Chen
Are you for?
0:44:40.320 --> 0:44:43.880
Jordan Terzian
Ohh, we're inside a a 1620 and 20.
0:44:43.920 --> 0:44:44.850
Jordan Terzian
How many people?
0:44:44.900 --> 0:44:47.30
Jordan Terzian
How many groups are in this course?
0:44:47.40 --> 0:44:50.90
Jordan Terzian
It feels like most during peace, I think 20 has the most.
0:44:50.100 --> 0:44:52.950
Jordan Terzian
From my understanding, the most amount of people, yeah.
0:44:54.70 --> 0:44:54.310
Guodong Chen
Please.
0:44:57.50 --> 0:44:57.760
Jordan Terzian
Yeah, bro.
0:44:57.850 --> 0:44:58.990
Jordan Terzian
Nice, bro.
0:44:59.610 --> 0:45:6.810
Jordan Terzian
EI keep having coworkers work past the glass and looking what we're doing, so I'm like just come in and sit down if you want to.
0:45:7.890 --> 0:45:8.390
Jordan Terzian
The calling.
0:45:12.270 --> 0:45:12.490
Jordan Terzian
Is he?

0:45:13.230 --> 0:45:13.870
Jordan Terzian
No, no, no, no.
0:45:14.110 --> 0:45:15.560
Jordan Terzian
That what happened?
0:45:15.570 --> 0:45:15.960
Jordan Terzian
Nothing.
0:45:15.970 --> 0:45:18.730
Jordan Terzian
We're just talking about the UM, which one?
0:45:18.740 --> 0:45:20.410
Jordan Terzian
Which projects have the most amount of people in them?
0:45:21.850 --> 0:45:23.530
Jordan Terzian
Well, I'm not surprised though.
0:45:23.610 --> 0:45:29.500
Jordan Terzian
At the end of the day, if you give it a list of 25 projects, we gonna take the easiest stuff, but I wouldn't say 20 years exactly easy.
0:45:29.510 --> 0:45:30.260
Jordan Terzian
What was 20?
0:45:30.830 --> 0:45:32.270
Jordan Terzian
Isn't that the Coles and Woolies 1?
0:45:33.10 --> 0:45:35.20
Jordan Terzian
How good question, I don't know.
0:45:39.150 --> 0:45:39.660
Jordan Terzian
Yeah.
0:45:39.670 --> 0:45:40.850
Jordan Terzian
Management management system.
0:45:44.670 --> 0:45:45.230
Jordan Terzian
Yeah, it is.
0:45:45.240 --> 0:45:46.440
Jordan Terzian
What's hard about this?
0:45:48.140 --> 0:45:55.240
Jordan Terzian
I'm really bad at that, just assumed it would be difficult to manage two separate companies, but no, it's just a straightforward.

0:45:55.250 --> 0:45:56.660
Jordan Terzian
It's like any other web app.
0:45:58.220 --> 0:45:58.460
Guodong Chen
How?
0:46:0.760 --> 0:46:1.20
Guodong Chen
I thought.
0:45:56.780 --> 0:46:5.270
Jordan Terzian
Cool like this one, which makes it like you if you wanna give a choice between a web app and
some deep learning ******** to source. As long.
0:46:5.280 --> 0:46:6.590
Jordan Terzian
Yeah. Like, yeah.
0:46:6.730 --> 0:46:7.90
Jordan Terzian
The ****?
0:46:7.100 --> 0:46:8.240
Jordan Terzian
Chose the Twitter sources one.
0:46:8.160 --> 0:46:8.440
Guodong Chen
Kind of.
0:46:8.250 --> 0:46:8.840
Jordan Terzian
That's what I was.
0:46:8.850 --> 0:46:12.750
Jordan Terzian
I mean, if you're really cracked at AI and you're gonna group, you can probably do it like that.
0:46:12.760 --> 0:46:13.690
Jordan Terzian
Masochist for.
0:46:14.580 --> 0:46:15.10
Guodong Chen
Why?
0:46:18.280 --> 0:46:19.780
Jordan Terzian
Yeah. Yes.
0:46:19.330 --> 0:46:20.150
Guodong Chen
I what what?
0:46:15.540 --> 0:46:20.290
Daniel Wang
Hey I is also a hardware deaf like he's got a shift GPU.

0:46:20.300 --> 0:46:20.930
Daniel Wang
What are you doing?
0:46:21.760 --> 0:46:22.590
Jordan Terzian
Yeah, you.
0:46:22.640 --> 0:46:24.670
Jordan Terzian
Yeah, you don't have a 100?
0:46:24.740 --> 0:46:26.110
Jordan Terzian
Yeah, you don't have a 100.
0:46:26.120 --> 0:46:26.680
Jordan Terzian
What are you gonna do?
0:46:28.170 --> 0:46:28.420
Guodong Chen
OK.
0:46:28.390 --> 0:46:32.420
Jordan Terzian
Not even you just get auto GPT to do it for you, but you imagine how expensive it's gonna be.
0:46:39.430 --> 0:46:40.440
Jordan Terzian
Welcome my podcast.
0:46:42.560 --> 0:46:43.460
Jordan Terzian
Welcome to our podcast.
0:46:43.990 --> 0:46:45.570
Jordan Terzian
Welcome, welcome to come.
0:46:44.830 --> 0:46:45.660
Daniel Wang
You're missing the.
0:46:45.750 --> 0:46:48.960
Daniel Wang
You're missing the oversized mics that need to be like covering your face.
0:46:49.660 --> 0:46:51.450
Jordan Terzian
We have a middle mic right here.
0:46:51.460 --> 0:46:52.780
Jordan Terzian
We can use this kind of funny.
0:46:52.810 --> 0:46:53.0
Guodong Chen
That's.

0:47:8.270 --> 0:47:10.970
Jordan Terzian
I love that no one else, and I also did this project.
0:47:11.970 --> 0:47:12.650
Jordan Terzian
Yeah, no one else.
0:47:12.690 --> 0:47:13.680
Jordan Terzian
Actually, no one else it up?
0:47:13.690 --> 0:47:17.830
Jordan Terzian
No, I think it was a couple double off of 20 though really, yeah.
0:47:23.320 --> 0:47:28.730
Jordan Terzian
Was it 1620 and 23 web platform connecting professionals with projects bro, this is Upwork.
0:47:29.20 --> 0:47:31.370
Jordan Terzian
Yeah, exactly, exactly.
0:47:31.380 --> 0:47:33.70
Jordan Terzian
It's he's also doing 23.
0:47:33.520 --> 0:47:39.410
Jordan Terzian
Is he doing 222320? No.
0:47:42.90 --> 0:47:42.340
Jordan Terzian
Now.
0:47:45.670 --> 0:47:45.830
Guodong Chen
Yeah.
0:47:46.150 --> 0:47:48.510
Jordan Terzian
And Doctor Hausman, his work cut out from, yeah.
0:47:50.520 --> 0:47:53.410
Jordan Terzian
Come up PDF reader for better paper reading experience and knowledge.
0:47:53.420 --> 0:47:54.80
Jordan Terzian
And this is crazy.
0:47:56.230 --> 0:47:56.330
Guodong Chen
Yeah.
0:47:56.570 --> 0:47:58.450
Jordan Terzian
Because knowledge graph for the rest of Jesus.

0:48:1.790 --> 0:48:2.310
Guodong Chen
I love.
0:48:1.610 --> 0:48:2.660
Jordan Terzian
Optional highlighting.
0:48:2.670 --> 0:48:6.10
Jordan Terzian
Commonly used topic specific phrasing, you know, this isn't that hard.
0:48:8.110 --> 0:48:8.350
Guodong Chen
OK.
0:48:10.340 --> 0:48:10.650
Guodong Chen
Hang up.
0:48:7.20 --> 0:48:10.980
Jordan Terzian
Better on this 19 we maybe we should Clippy this.
0:48:10.990 --> 0:48:12.90
Jordan Terzian
This isn't that bad.
0:48:12.310 --> 0:48:13.820
Jordan Terzian
You can do all of this in NLTK.
0:48:14.900 --> 0:48:15.720
Guodong Chen
All the German.
0:48:15.120 --> 0:48:16.580
Jordan Terzian
It was like, Oh well, document this stuff.
0:48:16.590 --> 0:48:17.520
Jordan Terzian
Nothing is like crazy, yeah.
0:48:19.80 --> 0:48:19.470
Guodong Chen
Hot.
0:48:19.720 --> 0:48:19.980
Jordan Terzian
Eric.
0:48:22.520 --> 0:48:22.840
Jordan Terzian
Anyway.
0:48:29.470 --> 0:48:30.810
Jordan Terzian
We've lost twelve soldiers.

0:48:31.330 --> 0:48:32.100
Guodong Chen
We've also.
0:48:31.630 --> 0:48:34.380
Jordan Terzian
Hey anyone doing databases system?
0:48:36.260 --> 0:48:36.430
Yuhao Yang
You know.
0:48:38.960 --> 0:48:40.350
Jordan Terzian
OK, that's enough. Yeah.
0:48:54.560 --> 0:48:55.100
Guodong Chen
You're doing.
0:48:57.250 --> 0:48:57.420
Guodong Chen
Maybe.
0:49:5.710 --> 0:49:6.210
Guodong Chen
I remember that.
0:49:10.720 --> 0:49:11.10
Guodong Chen
Stop.
0:50:34.300 --> 0:50:34.920
Jiaming Zou
Excuse me.
0:50:35.30 --> 0:50:43.240
Jiaming Zou
So if we want to form such a great group, maybe 20 or there's guys.
0:50:43.450 --> 0:50:49.50
Jiaming Zou
So if we have to reform our teams or maybe to share the proposal or something else.
0:50:50.610 --> 0:50:54.400
Jordan Terzian
I we I think we're just gonna stick more clarification from him from that.
0:50:54.410 --> 0:50:56.460
Jordan Terzian
Again, I don't think he even has permission to.
0:50:57.260 --> 0:50:57.770
Jordan Terzian
Umm.
0:50:58.30 --> 0:50:59.350
Jordan Terzian
All for us, something like that.
0:50:59.360 --> 0:51:6.970
Jordan Terzian

So for now, just do it as you're doing, and then I guess we'll see in the maybe after the proposal I imagine anyway, where he'd come up with a decision like that.
0:51:6.980 --> 0:51:8.700
Jordan Terzian
So just keep doing what you're doing for now I would say.
0:51:10.950 --> 0:51:11.350
Jiaming Zou
Alright.
0:51:11.240 --> 0:51:11.620
Jordan Terzian
They have.
0:53:29.230 --> 0:53:30.320
Jordan Terzian
Is this in the discord?
0:53:30.330 --> 0:53:31.20
Jordan Terzian
Is that what he said?
0:53:31.30 --> 0:53:32.780
Jordan Terzian
Sorry guys, I am taking longer.
0:53:33.70 --> 0:53:36.960
Jordan Terzian
Umm, I'll just say ET any, I'll just ask for an ETA.
0:53:39.490 --> 0:53:39.690
Jordan Terzian
OK.
0:53:47.760 --> 0:53:48.950
Jordan Terzian
Kind of feel sorry for this guy.
0:53:48.960 --> 0:53:49.520
Jordan Terzian
I'm not gonna lie.
0:53:51.930 --> 0:53:53.300
Jordan Terzian
Two meetings concurrently.
0:53:53.420 --> 0:53:54.130
Jordan Terzian
That's rough.
0:53:54.590 --> 0:53:55.460
Jordan Terzian
That's rough.
0:53:55.610 --> 0:53:56.130
Jordan Terzian
That was rough.
0:54:11.660 --> 0:54:15.660
Jordan Terzian
Can I also ask that anyone in here that's not in the discord just join the discord?

0:54:15.710 --> 0:54:19.160
Jordan Terzian
I think it's just a lot good forward communication considering he's already in here.
0:54:21.480 --> 0:54:22.190
Jordan Terzian
Thank you.
0:54:22.940 --> 0:54:25.260
Jordan Terzian
This code in the email train the very long one.
0:54:39.650 --> 0:54:40.160
Jordan Terzian
That was fast.
0:54:57.580 --> 0:55:0.720
Zhengxing Gu
So for the next meeting, do we with discard our teams?
0:55:3.170 --> 0:55:4.780
Jordan Terzian
Sorry, can you repeat that again?
0:55:6.530 --> 0:55:6.730
Jordan Terzian
Yeah.
0:55:4.50 --> 0:55:8.150
Zhengxing Gu
So for the next meeting, do we use discord or teams?
0:55:9.10 --> 0:55:10.40
Jordan Terzian
Yeah, I'd.
0:55:10.50 --> 0:55:11.580
Jordan Terzian
I'd imagine we just discard it.
0:55:11.590 --> 0:55:12.670
Jordan Terzian
I think it's worked fine.
0:55:12.680 --> 0:55:16.990
Jordan Terzian
How we've done it today, I don't think he's gonna have any problems with doing it like this in the future.
0:55:17.50 --> 0:55:23.520
Jordan Terzian
Maybe next time I know some people can't attend, we can split it up into or we can just hopefully do a recording.
0:55:23.530 --> 0:55:24.890
Jordan Terzian
I'll try find another platform.
0:55:24.900 --> 0:55:25.580
Jordan Terzian
We can do it on that.

0:55:25.590 --> 0:55:26.790
Jordan Terzian
We can actually record the meeting.
0:55:27.790 --> 0:55:28.390
Zhengxing Gu
OK. Thanks.
0:55:29.80 --> 0:55:29.480
Jordan Terzian
That's OK.
0:55:37.340 --> 0:55:47.140
Jordan Terzian
Yeah, I tried to get everyone into like, teams of five just to be easier on him, but I think it's I think he doesn't have generally just doesn't have the time to sit down with four different teams.
0:55:47.670 --> 0:55:49.400
Jordan Terzian
So I think it just works better than everyone.
0:55:49.410 --> 0:55:50.270
Jordan Terzian
Just kind of chilling in this.
0:55:52.460 --> 0:55:52.790
Jordan Terzian
Teams.
0:55:54.100 --> 0:55:54.840
Jordan Terzian
Yeah, I agree.
0:55:55.40 --> 0:56:2.730
Jordan Terzian
Yeah, I do appreciate everyone that put the team intros, though that was that was helpful despite not using any of them.
0:56:2.740 --> 0:56:6.300
Jordan Terzian
So my apologies that he didn't end up wanting them anyway.
1:0:25.210 --> 1:0:29.260
Jordan Terzian
The same is coming back now, guys, let me just request it.
1:0:29.270 --> 1:0:30.30
Jordan Terzian
Call him again.
1:0:31.520 --> 1:0:32.700
Jordan Terzian
No, that's the wrong keyboard.
1:0:34.90 --> 1:0:34.850
Jordan Terzian
Too many pieces.

1:0:37.70 --> 1:0:37.520
Jordan Terzian
Did you?
1:0:38.710 --> 1:0:41.650
Jordan Terzian
Yeah, just sent point.
1:0:46.460 --> 1:0:47.40
Jordan Terzian
Umm.
1:0:47.730 --> 1:0:50.220
Jordan Terzian
Sam is coming, OK?
1:0:55.430 --> 1:0:57.890
Jordan Terzian
So I also put it in the teams as well.
1:0:59.430 --> 1:0:59.830
Jordan Terzian
Check.
1:0:59.890 --> 1:1:0.300
Jordan Terzian
Check.
1:1:0.310 --> 1:1:1.220
Jordan Terzian
Yeah, I'll do it.
1:1:1.230 --> 1:1:2.480
Jordan Terzian
Chat, chat, chat, chat, chat.
1:2:39.90 --> 1:2:39.480
Jordan Terzian
Yeah.
1:2:39.490 --> 1:2:40.480
Jordan Terzian
So I don't know.
1:2:40.490 --> 1:2:44.430
Jordan Terzian
I might, depending on what he sends me for the next round of stuff for.
1:2:57.80 --> 1:2:57.680
Jordan Terzian
Welcome back.
1:2:58.800 --> 1:2:59.470
Basem Suleiman
I think you.
1:2:59.480 --> 1:3:2.70
Basem Suleiman
Sorry, just much longer so.

1:3:3.150 --> 1:3:3.570
Jordan Terzian
That's OK.
1:3:4.290 --> 1:3:4.660
Basem Suleiman
Yeah.
1:3:4.670 --> 1:3:5.40
Basem Suleiman
OK.
1:3:5.50 --> 1:3:9.260
Basem Suleiman
So OK, so we have four more questions I believe, right.
1:3:9.470 --> 1:3:12.380
Jordan Terzian
Yeah, we actually had the we actually have less than that now.
1:3:12.390 --> 1:3:14.590
Jordan Terzian
I believe we kind of filtered while you're away.
1:3:15.170 --> 1:3:16.590
Jordan Terzian
Umm, let me have a look.
1:3:18.260 --> 1:3:29.480
Jordan Terzian
This question was in regards to the does the development team have the freedom to make decisions like the structure of the pages and where each feature is located and how do users receive notifications?
1:3:29.490 --> 1:3:33.60
Jordan Terzian
Does it only happen within the platform or via some external ways like email?
1:3:34.700 --> 1:3:37.390
Basem Suleiman
Uh, no, I think we need to external ways.
1:3:38.180 --> 1:3:39.170
Basem Suleiman
Email is one of them.
1:3:41.430 --> 1:3:42.40
Basem Suleiman
Uh.
1:3:42.610 --> 1:3:43.180
Basem Suleiman
Phone.
1:3:43.190 --> 1:3:44.940
Basem Suleiman
Maybe we can test it.
1:3:44.950 --> 1:3:45.340
Basem Suleiman
Batik.

1:3:45.350 --> 1:3:47.530
Basem Suleiman
We might not have this as a high priority for now.
1:3:48.500 --> 1:3:48.930
Jordan Terzian
OK.
1:3:49.40 --> 1:3:49.590
Jordan Terzian
Yep.
1:3:50.100 --> 1:3:55.590
Jordan Terzian
Do we include all these designs in our proposals and arrange another meeting with you to
get them approved?
1:3:55.600 --> 1:3:58.500
Jordan Terzian
So I guess someone asking can you overlook the storyboards that they produce?
1:4:0.620 --> 1:4:4.170
Basem Suleiman
Ohh I think yeah, we might storyboards.
1:4:4.760 --> 1:4:7.50
Basem Suleiman
Yeah, I think that that would be my 60 size.
1:4:7.60 --> 1:4:12.690
Basem Suleiman
I think, I mean we need to have one synchronized meeting and it depends on the structure.
1:4:12.700 --> 1:4:13.410
Basem Suleiman
We will follow.
1:4:14.640 --> 1:4:14.880
Jordan Terzian
The.
1:4:13.970 --> 1:4:15.90
Basem Suleiman
The other thing I mentioned.
1:4:17.150 --> 1:4:17.370
Jordan Terzian
OK.
1:4:17.980 --> 1:4:20.730
Basem Suleiman
I mean, it's not for approval, it's more for feedback.
1:4:20.740 --> 1:4:29.720
Basem Suleiman
And I think if you want to get this feedback before you start implementing uh, that, that that
possible, I think it's gonna be cheaper for a change.
1:4:30.450 --> 1:4:32.280
Jordan Terzian
Yeah, this was a big question.

1:4:32.290 --> 1:4:34.240
Jordan Terzian
We were talking about while you're away.
1:4:35.10 --> 1:4:39.100
Jordan Terzian
How do you create an admin or for the purpose of this being a project?
1:4:39.110 --> 1:4:48.830
Jordan Terzian
Are we just going to assume that we're going to have someone in the back end that has admin rights from the get go as of or do you someone register as it or does an admin appoint another admin type thing?
1:4:51.720 --> 1:5:1.910
Basem Suleiman
I think we create the first one in the system and then we we allow super admin to add someone with the similar rights, right? Yeah.
1:5:0.800 --> 1:5:3.170
Jordan Terzian
OK. Yep.
1:5:5.190 --> 1:5:8.360
Jordan Terzian
Yeah, that that was all the questions that we had at the moment.
1:5:8.370 --> 1:5:20.600
Jordan Terzian
If anyone has any extra, can you just add it into the document and I'll ask them and then I'm just gonna let uh our client here talk of further of anything else he wants to discuss.
1:5:25.980 --> 1:5:26.160
Jordan Terzian
Yeah.
1:5:27.160 --> 1:5:27.480
Jordan Terzian
Umm.
1:5:28.680 --> 1:5:30.930
Jordan Terzian
Did you have anything else you wanted to talk about the SIM?
1:5:31.600 --> 1:5:32.340
Basem Suleiman
Yeah. OK.
1:5:34.140 --> 1:5:42.430
Basem Suleiman
It is not a question, I think one I mentioned about how we structure teams and it is possible to allow multiple teams to work together.
1:5:42.440 --> 1:5:59.830
Basem Suleiman
In one big project, umm, given the there will be implementing large number of features and that might help the teams to give you know give more focused some they might be say like we really good at the front end and the designs and some they are at the back end.

1:6:0.520 --> 1:6:9.470
Basem Suleiman
Uh, so, and then we might have one team for each, one for the front end, one for the back end, or two teams, front end, two teams for the back end.
1:6:10.230 --> 1:6:13.900
Basem Suleiman
Now there are questions about uh assessment.
1:6:14.20 --> 1:6:16.400
Basem Suleiman
Uh, I think one major question.
1:6:17.170 --> 1:6:22.480
Basem Suleiman
Basically I think I will discuss and confirm with Rashid and the tutors.
1:6:23.310 --> 1:6:32.740
Basem Suleiman
Basically, if we we say yes, we're gonna inform the tutors that this is the setup we have here and we make them aware of what you're doing.
1:6:32.750 --> 1:6:42.90
Basem Suleiman
So they don't treat that you as like you're missing back end or you didn't do any back end development, but in any way they will be option for doing more.
1:6:42.100 --> 1:6:53.970
Basem Suleiman
The fourteen side and the teams, they do their work, but still they need to talk to each other because they wanna get the the full picture and the whole system integrated.
1:6:54.450 --> 1:7:5.80
Basem Suleiman
And in that case we say, OK, we did the front end and that's integrates with the back end and you can show the front end and the back end, but say we've done this components in the front end or the back end, uh.
1:7:5.780 --> 1:7:16.260
Basem Suleiman
So this is what I will propose to Rashid and if he accepts that uh for that because of I have large teams here and I think there are some other projects they had similar things.
1:7:17.610 --> 1:7:18.160
Jordan Terzian
Yeah.
1:7:16.270 --> 1:7:18.340
Basem Suleiman
So this is a better way?
1:7:18.350 --> 1:7:19.320
Basem Suleiman
I thought had to deal with.
1:7:18.230 --> 1:7:20.800
Jordan Terzian
Yeah, we could do the same.

1:7:21.330 --> 1:7:21.520
Basem Suleiman
Umm.
1:7:20.810 --> 1:7:36.380
Jordan Terzian
If I may, then I propose that we also have a different team structure where you know you have four teams and then there's a, you know, someone or a few people appointed to making sure that the teams get their individual clusters done.
1:7:36.470 --> 1:7:47.240
Jordan Terzian
And then there is a synchronization between groups of, you know, actually being able to connect to the front end and back end together and making sure everyone on the same page about overall architecture.
1:7:47.530 --> 1:7:47.940
Jordan Terzian
Yeah.
1:7:47.950 --> 1:7:55.300
Jordan Terzian
And also it wouldn't hurt to have people and like in terms of branding, so not everyone has conflicting elements at all as well, yeah.
1:8:9.260 --> 1:8:9.730
Jordan Terzian
Of course.
1:8:26.500 --> 1:8:26.720
Jordan Terzian
Yeah.
1:7:57.840 --> 1:8:27.780
Basem Suleiman
I think the myself, I don't have an issue, but I think it's going to be from discussions, previous discussions in general with the Rasheed assessment, he would be concerned about the assessment if some teams, they will development, I would, I would say all teams will do development but the difference is that some teams will do front end and back end or even if you wanna choose to do front end and back end, but you do certain features from A-Z and then other teams do thing.
1:8:28.590 --> 1:8:30.390
Basem Suleiman
But this is 1 structure in.
1:8:30.670 --> 1:8:39.110
Basem Suleiman
I mean, I'm suggesting here one structure so another structure could be, uh, I mean we might have multiple ones if some teams agree.
1:8:39.120 --> 1:8:46.40
Basem Suleiman
I think in terms of sharing a project or working together, they need to agree on the STACK technology stack and the frameworks they want to use.
1:8:46.50 --> 1:8:54.820
Basem Suleiman

That means they all happy and I think I thought it might give an opportunity for those students who say we are very good at front end, not not back end.
1:8:54.830 --> 1:8:58.710
Basem Suleiman
They might focus on the front end and then other team is strong in the back end.
1:9:0.850 --> 1:9:1.10
Jordan Terzian
Yeah.
1:8:58.720 --> 1:9:7.200
Basem Suleiman
They can focus on the back end to create this opportunity for someone who doesn't need to struggle with that back end or front end. Uh.
1:9:5.70 --> 1:9:8.790
Jordan Terzian
Yeah, that I think it'll be good in building a full scale product.
1:9:8.800 --> 1:9:16.990
Jordan Terzian
Uh, my concern is more so making sure that across teams there's clear communication and agreement on the interfaces and branding.
1:9:17.0 --> 1:9:20.640
Jordan Terzian
So things you wanna keep consistent throughout the teams.
1:9:20.680 --> 1:9:34.790
Jordan Terzian
So what I was saying more so was if you would ask the tutor and the course can be there if someone will take responsibility of that kind of thing across the teams and you know, I think Jordan and me would be happy to do it.
1:9:34.800 --> 1:9:40.820
Jordan Terzian
If this goes through, we'll make sure that Dev and I dev and I uh kirponos together.
1:9:40.930 --> 1:9:41.900
Jordan Terzian
So I had to start up.
1:9:41.910 --> 1:9:45.70
Jordan Terzian
So we're trying to run this the same kind of way in our team anyway.
1:9:46.910 --> 1:9:47.150
Basem Suleiman
Yeah.
1:9:49.480 --> 1:10:0.540
Basem Suleiman
I think I I can ask, but you know it's my guess based on previous discussions that if some teams are not doing development, I think they might be a concern by the cost computer.
1:9:59.910 --> 1:10:1.440
Jordan Terzian
You know that I did elementary.

1:10:1.450 --> 1:10:3.440
Jordan Terzian
I think we'll still do development.
1:10:3.450 --> 1:10:8.880
Jordan Terzian
It's not always saying we're saying that there should be, even if it is not, someone should be responsible.
1:10:8.890 --> 1:10:13.420
Jordan Terzian
If you have multiple teams to make sure that each team is working on the same page, you get me.
1:10:14.910 --> 1:10:15.800
Basem Suleiman
Of course I do.
1:10:15.850 --> 1:10:16.430
Basem Suleiman
Of course I do.
1:10:17.60 --> 1:10:18.550
Basem Suleiman
Uh, like you?
1:10:22.120 --> 1:10:22.290
Jordan Terzian
Yeah.
1:10:24.350 --> 1:10:24.730
Jordan Terzian
Umm.
1:10:18.560 --> 1:10:27.650
Basem Suleiman
Work as like someone who integrates the work between the different teams and making sure they are thinking appropriately and I see that's definitely something I see you.
1:10:27.660 --> 1:10:28.690
Basem Suleiman
You can do work.
1:10:28.900 --> 1:10:32.340
Basem Suleiman
My my concern refers to the the way the assessment design.
1:10:33.610 --> 1:10:33.910
Jordan Terzian
Right.
1:10:32.350 --> 1:10:41.730
Basem Suleiman
The problem is that you know before user stories, they ask you for uh, you know, architecture designs and and stuff like that.
1:10:47.50 --> 1:10:47.280
Jordan Terzian
Yeah.

1:10:41.740 --> 1:10:52.200
Basem Suleiman
And I think it needs to be I I can't contain it from my side if we wanna allow this, but I think I I can ask and I see the benefit of what you're saying.
1:10:52.210 --> 1:10:52.740
Basem Suleiman
Definitely.
1:10:52.920 --> 1:10:53.370
Jordan Terzian
Yeah.
1:10:53.290 --> 1:10:54.360
Basem Suleiman
I mean, that's like.
1:10:53.700 --> 1:11:7.290
Jordan Terzian
My thing, my thing would be in terms of the organization of the project would be can we assume for the foreseeable future until the end of the proposal that we're working by ourselves and then we'll you relay us the tutors decision sometime in the next week.
1:11:7.300 --> 1:11:14.270
Jordan Terzian
So at least we can get a little bit organised because the last thing I think anyone else wants is to fall behind the other groups in terms of workload and stuff.
1:11:14.280 --> 1:11:16.380
Jordan Terzian
If we do start forming larger teams.
1:11:19.370 --> 1:11:19.810
Basem Suleiman
Umm.
1:11:20.950 --> 1:11:23.140
Basem Suleiman
I mean, there's one thing I was there.
1:11:23.210 --> 1:11:35.420
Basem Suleiman
The other thing I wanted to mention that maybe the list of this point is that some cheetahs might help to act as cheetah, given that I will talk to them and explain what we discussed and what we're planning to do.
1:11:36.250 --> 1:11:36.470
Jordan Terzian
Yeah.
1:11:35.610 --> 1:11:46.680
Basem Suleiman
And they might just be helping out umm to to speed things up because you meet them anyway and you can discuss with them when you meet them during the lab time.
1:11:47.370 --> 1:12:13.670
Basem Suleiman
Umm and the I think let me with the other one and then we can discuss as well this and what you mentioned Jordan the the other one is I was thinking if someone is keen to build a

mobile app, I said it's a web app because what I knew which I'm not sure that not many students they do any mobile development here in terms of courses or I don't know if they learned it but mobile.
1:12:12.980 --> 1:12:14.40
Jordan Terzian
There is a there is.
1:12:14.720 --> 1:12:15.10
Basem Suleiman
Yep.
1:12:14.680 --> 1:12:16.110
Jordan Terzian
There is a mobile device, yeah.
1:12:16.810 --> 1:12:17.890
Basem Suleiman
Uh, which course is it?
1:12:18.480 --> 1:12:21.880
Jordan Terzian
Come 4511, it's user interface design.
1:12:22.880 --> 1:12:24.420
Basem Suleiman
So they do mobile OK.
1:12:24.810 --> 1:12:28.250
Jordan Terzian
Yes, but it's a it's a, it's a like a pot.
1:12:28.260 --> 1:12:29.430
Jordan Terzian
Two of three 511.
1:12:29.440 --> 1:12:30.680
Jordan Terzian
So not everyone would have done it.
1:12:33.220 --> 1:12:33.360
Basem Suleiman
Yeah.
1:12:30.690 --> 1:12:34.220
Jordan Terzian
And you get a distinction in 3511 to do mobile development.
1:12:34.280 --> 1:12:34.450
Jordan Terzian
Yeah.
1:12:35.10 --> 1:12:35.580
Basem Suleiman
OK.
1:12:36.80 --> 1:12:36.370
Jordan Terzian
Yeah.

1:12:36.50 --> 1:12:36.370
Basem Suleiman
Thank you.
1:12:36.380 --> 1:12:38.790
Jordan Terzian
So that takes your reactive in that course.
1:12:38.540 --> 1:12:39.160
Basem Suleiman
Yeah.
1:12:39.360 --> 1:12:39.660
Basem Suleiman
Yeah.
1:12:39.700 --> 1:12:40.400
Basem Suleiman
OK.
1:12:40.560 --> 1:12:42.490
Basem Suleiman
No exception for mobile app.
1:12:42.500 --> 1:12:47.60
Basem Suleiman
So I thought if Team is one team or two teams is keen to do a mobile app.
1:12:47.680 --> 1:12:49.190
Basem Suleiman
Uh, and that's possible.
1:12:49.240 --> 1:12:50.150
Basem Suleiman
Uh, I think.
1:12:50.780 --> 1:13:1.20
Basem Suleiman
I did mention a web app for reason that I've been told that money not, not many students can do or might have the skills and knowledge to do the mobile app, but that's an option.
1:13:0.170 --> 1:13:6.800
Jordan Terzian
And we yeah, we're building a mobile app, so I'm sure we could build that if you interested in doing a mobile app.
1:13:7.80 --> 1:13:8.230
Basem Suleiman
Mobile app OK.
1:13:6.850 --> 1:13:8.550
Jordan Terzian
The two of us, yeah.
1:13:8.240 --> 1:13:18.820
Basem Suleiman
If you interested, that can be one possible, maybe team or you can team up with another team if if also we can work out a way for allowing teams to work together.

1:13:20.20 --> 1:13:20.200
Jordan Terzian
Yeah.
1:13:19.880 --> 1:13:21.990
Basem Suleiman
Uh, these are the different structures.
1:13:22.0 --> 1:13:27.400
Basem Suleiman
I did think about, but I think we can go back to your question, Jordan, if I didn't understand yet.
1:13:28.800 --> 1:13:28.980
Jordan Terzian
Yeah.
1:13:29.650 --> 1:13:30.260
Basem Suleiman
They lost?
1:13:30.390 --> 1:13:31.230
Basem Suleiman
To us about.
1:13:33.380 --> 1:13:35.480
Basem Suleiman
Tutors working with tutors is 1, right?
1:13:36.230 --> 1:13:36.990
Jordan Terzian
Yeah. Umm.
1:13:38.170 --> 1:13:41.820
Basem Suleiman
Because I I'm considering to go to ask some of the cheaters.
1:13:42.150 --> 1:13:44.260
Basem Suleiman
Who can I get the name of the cheaters?
1:13:44.270 --> 1:13:49.530
Basem Suleiman
I think I can't see them, but let me look good for you different groups.
1:13:46.620 --> 1:13:52.820
Jordan Terzian
The truth is in the in the uh, I think I think you say save them into your email.
1:13:55.70 --> 1:13:55.970
Basem Suleiman
Let me look at them.
1:13:52.830 --> 1:13:56.450
Jordan Terzian
From my understanding, your original one. Yeah.
1:13:56.290 --> 1:13:56.530
Basem Suleiman
I'm not.

1:13:56.460 --> 1:13:57.100
Jordan Terzian
Yeah, two days.
1:13:57.110 --> 1:13:58.720
Jordan Terzian
Uh, CC that in your email.
1:13:59.30 --> 1:14:5.740
Basem Suleiman
You know, so this is a project 16, we've got Rachid, Mark.
1:14:5.830 --> 1:14:13.860
Basem Suleiman
Mark maybe can work with me or my happy might be happy to actually be act as a
coordinator watching as well.
1:14:15.830 --> 1:14:20.580
Basem Suleiman
Uh, there's one mark and Mark.
1:14:20.770 --> 1:14:22.130
Basem Suleiman
Frank also is.
1:14:22.180 --> 1:14:22.820
Basem Suleiman
Yeah.
1:14:23.590 --> 1:14:26.480
Basem Suleiman
Meaning maybe not how? Maybe yes.
1:14:26.570 --> 1:14:42.890
Basem Suleiman
How so there are, I think all the tutors are involved there, but I think I mentioned the people
who probably will work with me because they did work with me before and they I think they
all suffer engineers, they they can also give give good advice in in different questions as well.
1:14:43.550 --> 1:14:46.450
Basem Suleiman
Uh, so Frank is one of the mark.
1:14:47.40 --> 1:14:51.340
Basem Suleiman
I'm watching and how?
1:14:53.220 --> 1:14:54.330
Basem Suleiman
Maybe how? How?
1:14:54.340 --> 1:14:55.230
Basem Suleiman
I just need to.
1:14:55.580 --> 1:14:58.210
Basem Suleiman
Yeah, I think, yeah, those four.

1:15:0.560 --> 1:15:4.560
Basem Suleiman
Uh, because the the others not.
1:15:4.640 --> 1:15:5.490
Basem Suleiman
I'm not sure.
1:15:5.550 --> 1:15:6.830
Basem Suleiman
I don't think they might.
1:15:9.930 --> 1:15:10.540
Jordan Terzian
Yeah.
1:15:7.0 --> 1:15:11.20
Basem Suleiman
They might agree to actually do that and then.
1:15:10.610 --> 1:15:12.960
Jordan Terzian
What is the the ideal structure in your eyes?
1:15:15.370 --> 1:15:22.460
Basem Suleiman
Uh, I mean one thing I thought about, it's probably one team can do much right.
1:15:23.280 --> 1:15:23.480
Jordan Terzian
Umm.
1:15:23.190 --> 1:15:29.900
Basem Suleiman
Uh, and if one team, if if we take the structure as is, every team will build the same platform.
1:15:30.920 --> 1:15:31.130
Jordan Terzian
Umm.
1:15:30.550 --> 1:15:31.490
Basem Suleiman
First, we have a way.
1:15:31.870 --> 1:15:41.630
Basem Suleiman
You know, West of effort and then time because I think team can join forces and can make bigger uh platform.
1:15:42.120 --> 1:15:42.930
Jordan Terzian
Remember sound? Yeah.
1:15:42.470 --> 1:15:58.60
Basem Suleiman
But again, yeah, so I would say not considering one I was considering to do maybe split into big teams and maybe so one team or two teams they want to do individually.
1:15:58.70 --> 1:15:58.550
Basem Suleiman
That's OK.

1:15:58.560 --> 1:16:3.540
Basem Suleiman
They might just focus on doing something individual because it it's a preference for the teams, right?
1:16:3.600 --> 1:16:5.110
Basem Suleiman
I I can't impose anyone.
1:16:5.870 --> 1:16:6.90
Jordan Terzian
Yeah.
1:16:5.810 --> 1:16:6.100
Basem Suleiman
It's.
1:16:6.110 --> 1:16:6.560
Basem Suleiman
It's what?
1:16:6.630 --> 1:16:11.230
Basem Suleiman
What you would like to do guys as well, but there are definitely benefits and they are definitely.
1:16:11.630 --> 1:16:20.520
Basem Suleiman
Umm, you know pros and cons and this is something I mentioned to other teams and other project working in bigger teams.
1:16:20.530 --> 1:16:23.0
Basem Suleiman
This is a structure you see also in Google and other ones.
1:16:23.10 --> 1:16:29.540
Basem Suleiman
They were creating big project and then under that big project they created subproject and then they work independently.
1:16:29.610 --> 1:16:33.220
Basem Suleiman
They of course coordinate and they integrate parts together.
1:16:34.290 --> 1:16:35.340
Basem Suleiman
This kind of structure.
1:16:36.40 --> 1:16:41.480
Basem Suleiman
Uh, it's a good experience and it's something good to show in in CV.
1:16:41.490 --> 1:16:46.570
Basem Suleiman
And when you're doing interviews, you've done, you know, such kind of work here.
1:16:46.590 --> 1:16:46.790
Jordan Terzian
Yeah.

1:16:46.820 --> 1:16:50.30
Basem Suleiman
When you work as one team, you will need to work on the front end.
1:16:50.40 --> 1:16:51.250
Basem Suleiman
You need to work on the back end.
1:17:0.220 --> 1:17:0.430
Jordan Terzian
OK.
1:17:1.400 --> 1:17:1.860
Jordan Terzian
All right.
1:16:51.260 --> 1:17:2.380
Basem Suleiman
You need to do everything from A-Z and I think this where you start to get distracted by doing front end, back end and different things with let's say 55 people, yeah.
1:17:2.400 --> 1:17:19.390
Jordan Terzian
Well, until we confirm that structure with the tutors and whatnot, I we can we confidently assume that until our proposal is handed in next Friday that we're just continuing as is just for the sake of the students that current workload.
1:17:20.100 --> 1:17:21.870
Basem Suleiman
No problem for that, no problem.
1:17:22.610 --> 1:17:23.30
Jordan Terzian
Or something.
1:17:22.280 --> 1:17:24.560
Basem Suleiman
Yeah, I think the yeah.
1:17:24.570 --> 1:17:30.220
Basem Suleiman
But I mean in terms of meetings, it needs to be synced because you can imagine like large number of teams.
1:17:30.960 --> 1:17:31.140
Jordan Terzian
Yeah.
1:17:31.210 --> 1:17:32.620
Basem Suleiman
Uh, yeah.
1:17:38.850 --> 1:17:39.50
Jordan Terzian
Yeah.
1:17:32.630 --> 1:17:45.300
Basem Suleiman
But I think I will ask after the meeting and see if I can get quick responses and then also you

from your side as well, you need to decide if teams need to work together in the bigger team.
1:17:46.40 --> 1:17:46.620
Basem Suleiman
Umm.
1:17:47.80 --> 1:17:48.700
Basem Suleiman
And what structure you you prefer?
1:17:49.740 --> 1:17:49.980
Jordan Terzian
Cool.
1:18:1.140 --> 1:18:1.290
Jordan Terzian
You.
1:17:49.600 --> 1:18:2.270
Basem Suleiman
I mean, if we if we might get combinations like some teams, they form bigger teams and some teams they say wanna work independently because you remember the technology stack and frameworks you like to work on a mobile app.
1:18:2.280 --> 1:18:3.210
Basem Suleiman
So that's great.
1:18:3.220 --> 1:18:5.180
Basem Suleiman
We can do also the mobile app thing.
1:18:6.770 --> 1:18:8.150
Jordan Terzian
Yeah, yeah.
1:18:6.80 --> 1:18:8.270
Basem Suleiman
It's some other teams interested in mobile app.
1:18:8.190 --> 1:18:15.40
Jordan Terzian
The only thing the only thing that would be stopping, I guess us from considering working as part of a larger team is the organization of it.
1:18:15.210 --> 1:18:17.940
Jordan Terzian
People have different classes at different times and different workloads.
1:18:17.950 --> 1:18:28.700
Jordan Terzian
I think syncing up the beauty of being in tutorials together is that that is the time you've nominated to be with that team and for an hour tutorial, there's where the only group doing 16, so it's it's not.
1:18:28.710 --> 1:18:44.470
Jordan Terzian
I don't think it'd be entirely feasible to find a time that everyone is available to chat in the length that would require to, you know, sync up development team that take, but maybe

what we could do is suggest the time if we talk to the other groups and then we could work with the course to say like this is the hour.
1:18:44.580 --> 1:18:49.960
Jordan Terzian
Yeah, that everyone doing 16 wants to come into uni and work on, yeah.
1:18:50.690 --> 1:18:51.220
Basem Suleiman
Right.
1:18:58.970 --> 1:19:0.310
Jordan Terzian
Ah, yeah, that'd be good. Yeah.
1:18:51.790 --> 1:19:7.690
Basem Suleiman
Uh tutorials that something we wanted to do first where we put teams in the same tutorial, they do same project but that was that was out of control because it's predetermined long time ago that's controlled by central timetable.
1:19:8.910 --> 1:19:11.980
Basem Suleiman
Yeah, it also could help you know the client.
1:19:11.990 --> 1:19:15.420
Basem Suleiman
Also, they can't do one tutorial, they have multiple teams in that tutorial like they want.
1:19:16.390 --> 1:19:17.10
Jordan Terzian
Yeah, yeah.
1:19:16.220 --> 1:19:28.690
Basem Suleiman
But there was, uh, but I think you're right about the organization and getting many people, I think with the use of tools and most of the work will be online except where we need to maybe discuss major things.
1:19:30.820 --> 1:19:31.20
Jordan Terzian
Yeah.
1:19:28.700 --> 1:19:35.410
Basem Suleiman
This is where you need to get together and it can be done with augment by with the online collaborative tools.
1:19:35.420 --> 1:19:36.480
Basem Suleiman
You know it can.
1:19:36.550 --> 1:19:37.950
Basem Suleiman
It can be made easy, I think.
1:19:39.130 --> 1:19:39.800
Jordan Terzian
OK for sure.

1:19:39.180 --> 1:19:41.730
Basem Suleiman
Uh, yeah, you're right.
1:19:41.740 --> 1:19:44.620
Basem Suleiman
I think you know teams need to make sure that they can work together.
1:19:44.630 --> 1:19:51.580
Basem Suleiman
They can, you know, arrange and they can cope with the different times and, you know, availabilities.
1:19:54.540 --> 1:20:1.550
Jordan Terzian
Will you let us know when you hear back more about the assessment scheme as well and what the proposal will be from the core stuff?
1:20:5.210 --> 1:20:6.60
Jordan Terzian
Thank you. Awesome.
1:20:2.620 --> 1:20:6.120
Basem Suleiman
Of course, I'll let you know as soon as I know on the channel.
1:20:7.30 --> 1:20:11.690
Basem Suleiman
Uh, I will blossom discord or the team channel.
1:20:11.520 --> 1:20:11.900
Jordan Terzian
Cool.
1:20:11.910 --> 1:20:12.390
Jordan Terzian
Thank you.
1:20:12.400 --> 1:20:12.770
Jordan Terzian
Alright.
1:20:12.780 --> 1:20:15.550
Jordan Terzian
Well, I think that's everything everyone had.
1:20:15.560 --> 1:20:25.610
Jordan Terzian
If anyone has any final questions or on your own if you wanted to mention anything else, I think now would be the time and then we can all wait and see your first months later.
1:20:31.360 --> 1:20:32.80
Jordan Terzian
Nothing.
1:20:32.340 --> 1:20:33.150
Jordan Terzian
I think that's it.

1:20:33.160 --> 1:20:33.830
Jordan Terzian
That's it.
1:20:33.880 --> 1:20:35.80
Jordan Terzian
Well, thank you so much for your time.
1:20:36.220 --> 1:20:36.610
Basem Suleiman
Pleasure.
1:20:36.620 --> 1:20:37.310
Basem Suleiman
Thank you guys.
1:20:37.320 --> 1:20:38.950
Basem Suleiman
And looking forward to working with all of you.
1:20:39.890 --> 1:20:41.760
Jordan Terzian
Likewise, likewise, we'll talk soon.
1:20:42.310 --> 1:20:43.630
Jordan Terzian
Yes, everyone just. Yep.
1:20:43.640 --> 1:20:44.400
Jordan Terzian
Thank you for coming.
1:20:44.410 --> 1:20:44.860
Jordan Terzian
Thank you.
1:20:45.240 --> 1:20:45.460
Basem Suleiman
No.
1:20:44.870 --> 1:20:46.230
Jordan Terzian
And looking forward to hearing from you.
1:20:46.270 --> 1:20:47.0
Jordan Terzian
Yeah, alright.
1:20:47.10 --> 1:20:48.30
Jordan Terzian
Have a good weekend, everyone.
1:20:46.610 --> 1:20:48.790
Basem Suleiman
Great, Sheffield, thank you.
1:20:48.800 --> 1:20:48.970
Basem Suleiman
You too.

1:20:48.490 --> 1:20:49.50
Jordan Terzian
See you soon.
